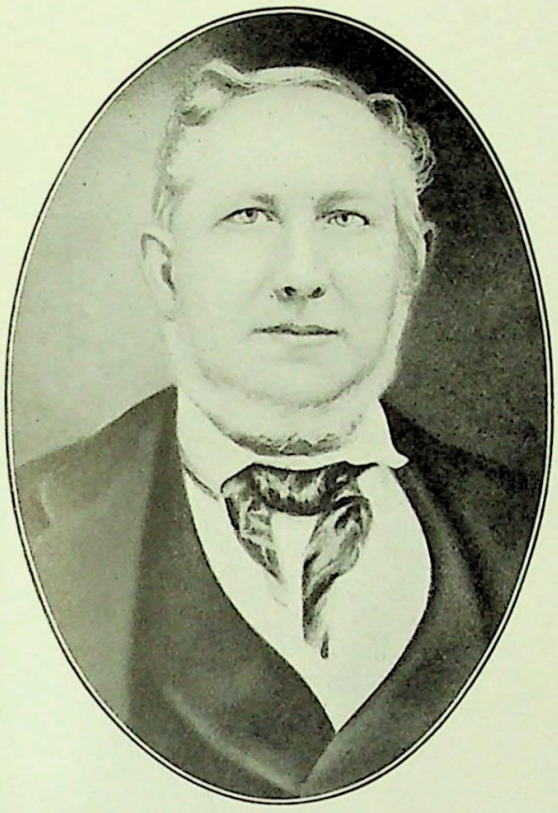
The Matthews of Yesterday and Today



Photograph of John D. Matthews,
Founder of Jas. H. Matthews & Co.

BACK in 1849, when many men were wending their way to the gold fields of California, John D. Matthews, the founder of this business, conceived the idea of starting a business to manufacture stencils, steel dies, steel stamps, and other kindred marking devices.

The inauguration of this idea occurred in 1850, where, in a little storeroom and a small upper floor space, the business of John D. Matthews & Sons was started.

The policy of the firm in the yesterdays, as it is to-day, was to make the kind of marking devices that would render the right kind of service during working use and to only manufacture such products that would make and hold customers.

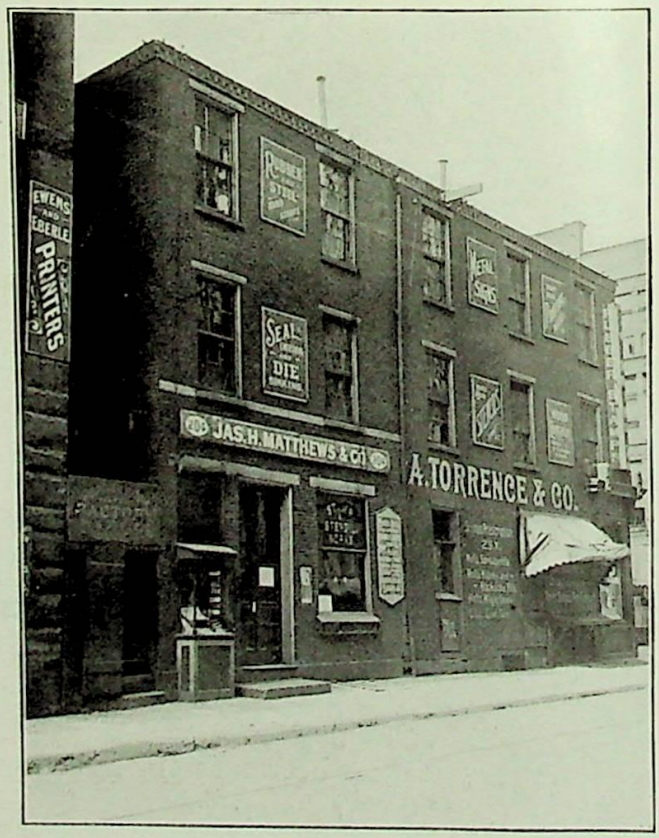
The growth of this business since 1850, to date, is illustrated in this catalog. From this small beginning, the firm of Jas. H. Matthews & Co., "Matthews of Pittsburgh," has grown to be the largest firm of its kind in the United States, manufacturing marking devices that nearly every industry has need of. It is our aim and our creed to continue our steady growth by rendering the same efficient service which has so largely been a factor in the building of our business to its present size.

51501

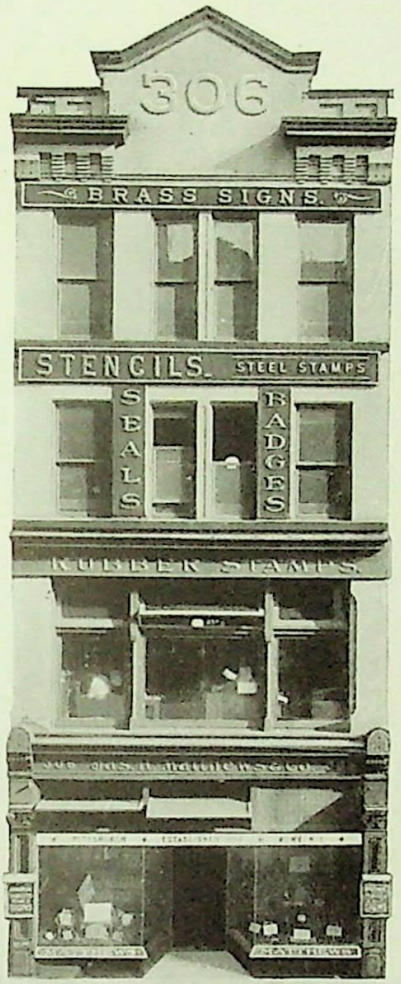
5150/

This small storeroom and a small upper floor space was the real beginning of Jas. H. Matthews & Co.

For sixteen years, in this location, on the corner of 3rd Ave. and Market St., Pittsburgh, Pa., the firm of Jas. H. Matthews & Co., continued to give quality and service in marking devices.



Our Home for Nine Years Until Our Removal to Forbes Field



FOR nine years we occupied this building until the rapid growth of our business compelled us to move (Feb. 1, 1912) to our present quarters, also moving our store and salesroom to 420 Wood St.

The site we selected for our new home is in the Oakland District, the beauty spot of Pittsburgh. Here is located the Carnegie Institute, Carnegie Technical Schools, University of Pittsburgh, Carnegie Library, Soldiers' Memorial Building, Schenley Park, and Forbes Field, the Famous Pittsburgh Baseball Park of the National League and the home of Hans Wagner.

Such surroundings as these, combined with good light, good air and sunshine, efficiency experts tell us, are important factors in making ideal working conditions for our employees. Our customers receive the benefit as well as ourselves.

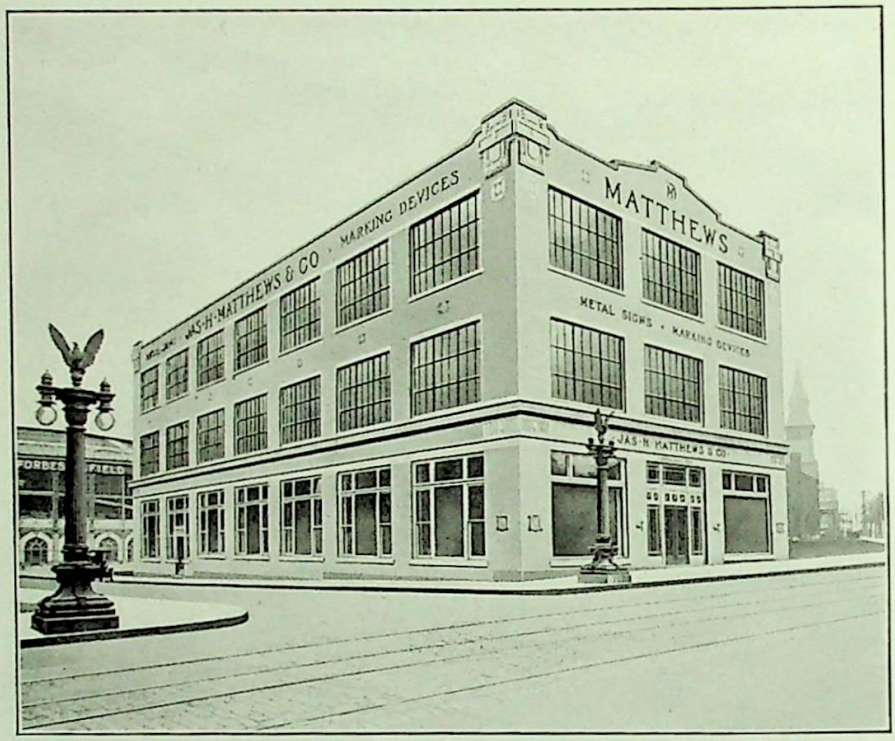
GENERAL OFFICES AND FACTORY

The Largest and Most Modernly Equipped Factory in the United States devoted to the Manufacturing of Marking Devices and Metal Signs



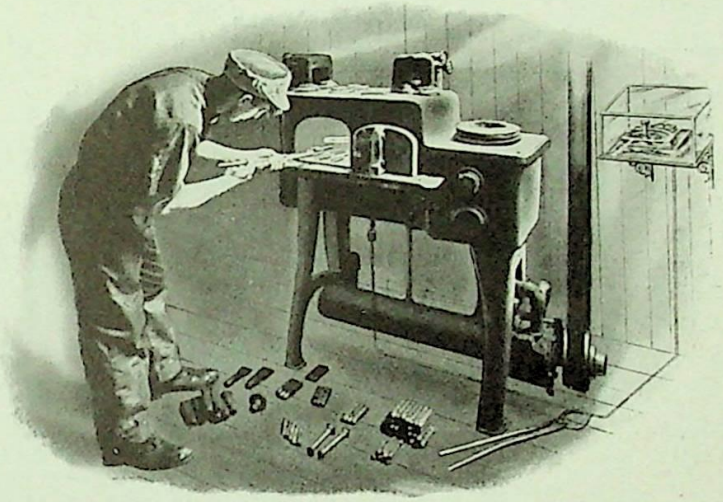
LOCATED AT FORBES FIELD, 3942-44-46 FORBES STREET, PITTSBURGH, PA.

In this factory, the largest in the United States devoted to the manufacturing of Marking Devices and Metal Signs, is every possible equipment for manufacturing every marking device that any industry has need of. Here, with an organization of skilled workmen, with capable executives at the head of each department, we turn out the kind of marking devices illustrated in this catalog. With this new modern factory, it is the aim and purpose of Jas. H. Matthews & Co. not merely to get orders, but to make customers, by continuing to make the very best marking devices that can be produced. You can safely trust your orders with us because we have the men, the factory, the equipment and the location to give you what you want, when you want it and the way you want it. Be it a small rubber stamp or a heavy marking device, your orders will receive that attention which comes only with improved methods, equipment and modern organization.

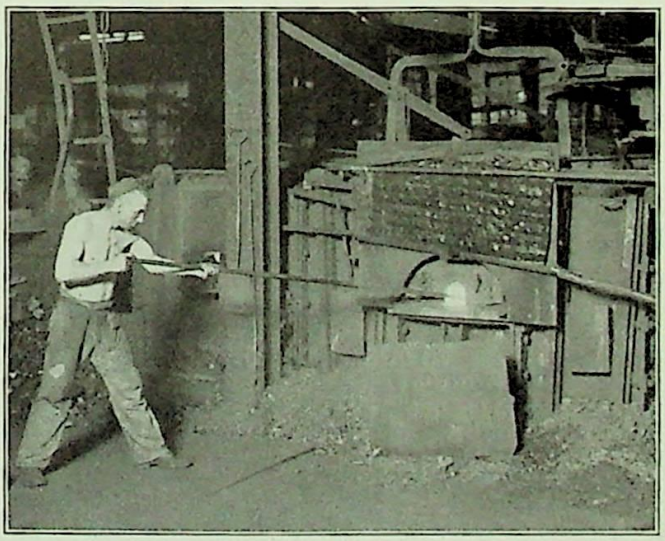
Dies and Stamps Made to Mark Your Particular Product

Our steel dies and stamps are Scleroscope tested and Pyrometer heated, thus assuring the maximum number of markings and clear, true reproductions. They are forged in our own forging department from the best grade of tool steel specifically suited to the particular products to be marked.

The following steel die and stamp pages give but a faint idea of the different kinds of steel dies and stamps we have made or are capable of making. No matter what kind of a steel die or stamp you may wish, comparisons during working use will easily prove the worth of Matthews' Steel Stamps and Dies. Write us fully regarding your requirements.



By the aid of the Pyrometer we gauge the exact degree to which the die or stamp should be heated thus eliminating guess work and prolonging the life and service of our steel stamps and dies



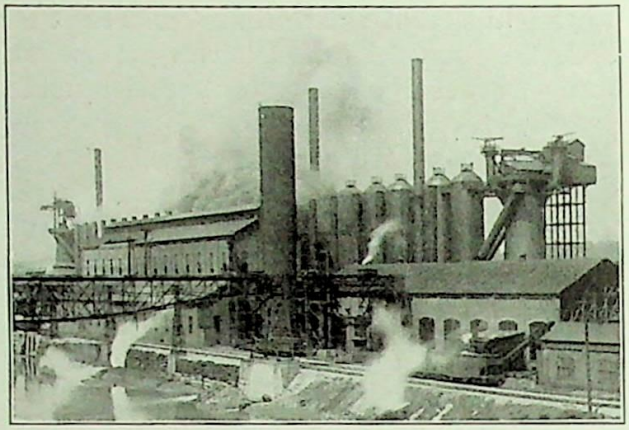
INTERIOR OF PITTSBURGH STEEL MILL

Thousands of steel workers help to produce the world's greatest tonnage of steel

We Make Steel Lettering Dies and Stamps

That Render Maximum Service During Working Use

The Home of good Steel. One of the many steel mills in the Pittsburgh District

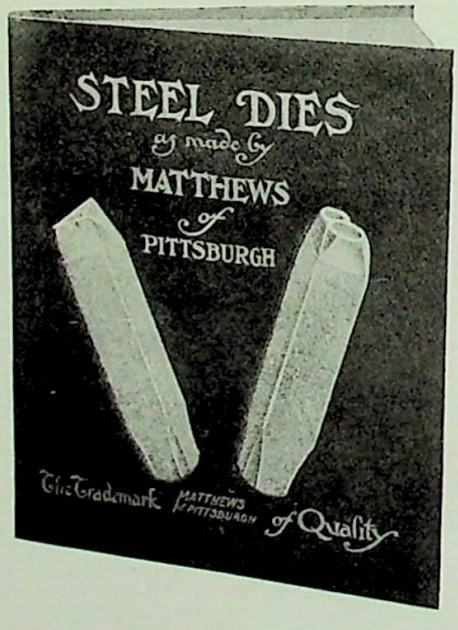


The Home of good steel lettering dies and stamps is "Matthews of Pittsburgh"

Our location in Pittsburgh, the world's largest steel centre, enables us to properly select the right grade of steel for making our steel dies and stamps and facilitates delivery.

"Pittsburgh is, and will continue to be, the greatest iron and steel center of the world."
—JUDGE E. H. GARY, United States Steel Corporation

For the convenience of the steel die and stamp user, we have prepared this handy illustrated booklet.



A copy of this interesting booklet will be gladly mailed on request. Write for your copy.

Steel Lettering Dies and Stamps

On the following pages we illustrate a few of the many steel lettering dies and stamps which we manufacture. We operate the largest and most modernly equipped shop in the United States for manufacturing all classes of steel lettering dies and stamps and kindred marking devices. We invite your orders and inquiries in this line, assuring you of reasonably prompt deliveries and efficient service.

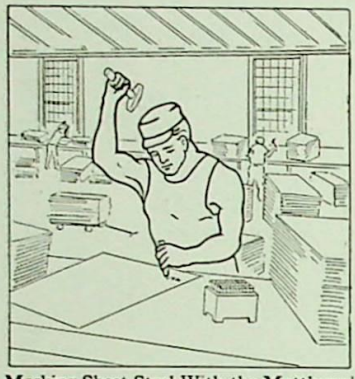
HAND-MADE STEEL LETTERS AND FIGURES

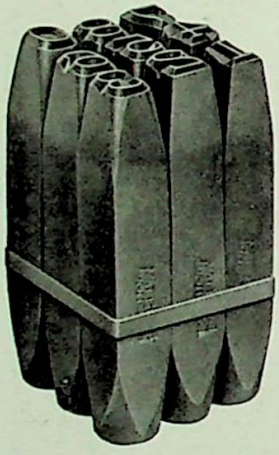
STRICTLY HAND CUT FROM BEST TOOL STEEL
PYROMETER HEATED AND SCLEROSCOPE TESTED



Marking Sheet Steel With the Matthews' Hand-made Steel Letters and Figures

Our hand-made steel letters and figures are made in two styles as illustrated, regular standard bevel, like cut on the right, and "Pittsburgh Bevel," like cut on the left.

While we sell a good many sets of our regular standard style, our sales indicate that most people prefer to use the "Pittsburgh Bevel," not alone because the nature of the forging makes it capable of lengthy service and more adaptable for all kinds of metals, but also because the construction of the bevel enables the user to see and to gauge the speed and accuracy of the marking during the stamping operation.



Pittsburgh Bevel Hand-made Steel Letters and Figures

Hand-made steel letters and figures give better impressions and longer service and are above comparison to the machine-made kind, no matter what product is to be marked. We make thousands of sets of these hand-made letters and figures. They *wear* right and work right because they are *made* right. If you wish to test the quality of our steel stamp work, just get a set of these figures or letters and learn by actual use why "out-of-town people" come to Matthews of Pittsburgh, to buy hand-made steel letters and figures.

Pittsburgh Bevel Steel Letters and Figures

For the Man in the Shop Who Knows

The men in the shop who do steel stamping "fall in love" with the Pittsburgh Bevel Hand-made Steel Letters and Figures the first time they see and start to use 'em. They are quick to recognize and to point out to their fellow workers the bevel feature that makes these letters and figures so different from the ordinary kind. Read below what one first user thinks of the "Pittsburgh Bevel."

SUBJECT

Nov. 3rd, 1913.

Messrs. James H. Matthews and CO.,
3942-6 Forbes St., Pittsburg, Pa.

Gentlemen:

We beg to acknowledge your two favors of Oct. 16th and 18th relative to stamping machine and figures covered by our order 9168.

As regards the stamping machine, we are rather disappointed to find that there is no machine in the market which could handle our work satisfactorily, yet on the other hand we appreciate your kind advices to the effect that there is no machine made so far as you know which can do it. We have been seeking a machine for some time which could do the work but this is the first instance where we have been told that such was unobtainable.

The steel letters and figures per our order 9168 have been received and are glad to tell you they are the best, judging from general appearances and first usage, that we have ever been able to buy. If they continue to prove as satisfactory there will be many more which we will place orders for.

Yours very truly,

THE DENVER ROCK DRILL MANUFACTURING CO.,

MATTHEWS' EYE FORGING STEEL STAMPS

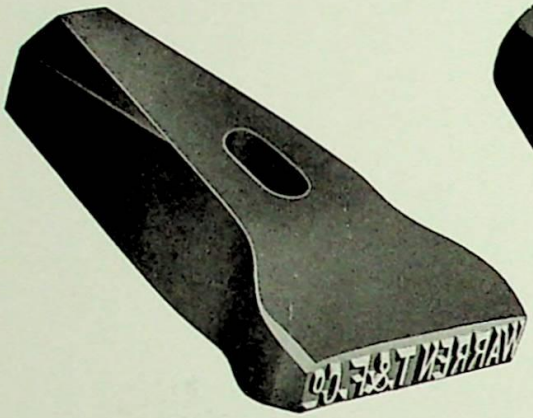

ILLUSTRATION No. 1

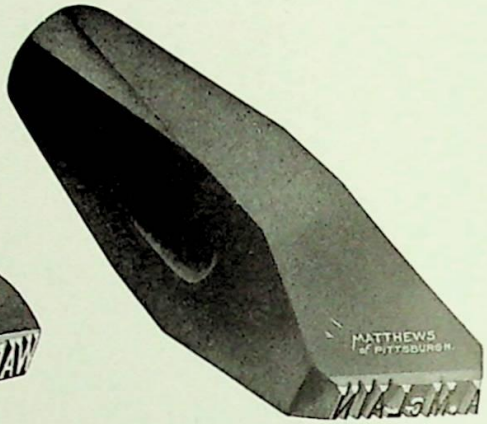

ILLUSTRATION No. 2

HERE ARE TWO STYLES OF EYE FORGING STAMPS

Forged in our own forging department, these steel hand stamps made with eye in forging, are used with a handle for heavy stamping. They are cut from best tool steel and tempered to suit the product to be marked. When ordering always state what products are to be marked, so that stamps can be cut and tempered accordingly. Illustration No. 1 shows the stamp with eye in forging running crosswise or at a right angle to the letters. Illustration No. 2 shows the stamp with eye in forging running lengthwise or parallel with the letters. Be sure to specify which you desire when ordering.

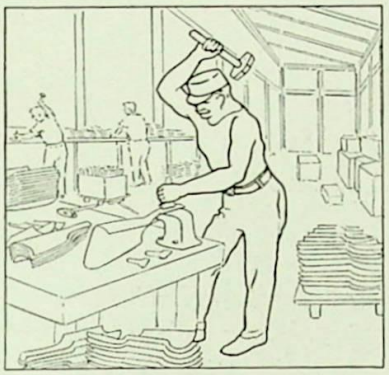
PRICES :

Forgings, 35c per Pound. Letter Cutting, extra as follows:

1/32 in.	25c per letter	1/4 in.	20c per letter
1/24 in.	20c per letter	5/16 in.	24c per letter
1/16 in.	15c per letter	3/8 in.	28c per letter
3/32 in.	15c per letter	7/16 in.	33c per letter
1/8 in.	15c per letter	1/2 in.	33c per letter
5/32 in.	16c per letter	5/8 in.	48c per letter
3/16 in.	16c per letter	3/4 in.	60c per letter
7/32 in.	20c per letter	1 in.	$1.00 per letter

Lettering cut on curved lines, 25% extra. Lettering cut on convex or concave surface, 33% extra. Plain borders, $1.00 an inch, measuring longest way of border. Fancy borders are extra price according to design. Designs, trade-marks, symbols and special style lettering extra price according to time required for cutting.

MADE TO ORDER STEEL HAND STAMPS



Showing stamp in use marking steel products

REGULAR FORGING PYROMETER HEATED—SCLEROSCOPE TESTED

The kind of steel we use, combined with proper cutting and tempering tell the story of the marking and service value of Matthews' Steel Hand Stamps. All Matthews' Steel Hand Stamps are forged in our own forging department from best tool steel, and cut and tempered to suit the particular product you desire to mark. When ordering our steel hand stamps, please state what the stamps are to be used for, so we can temper and cut accordingly.

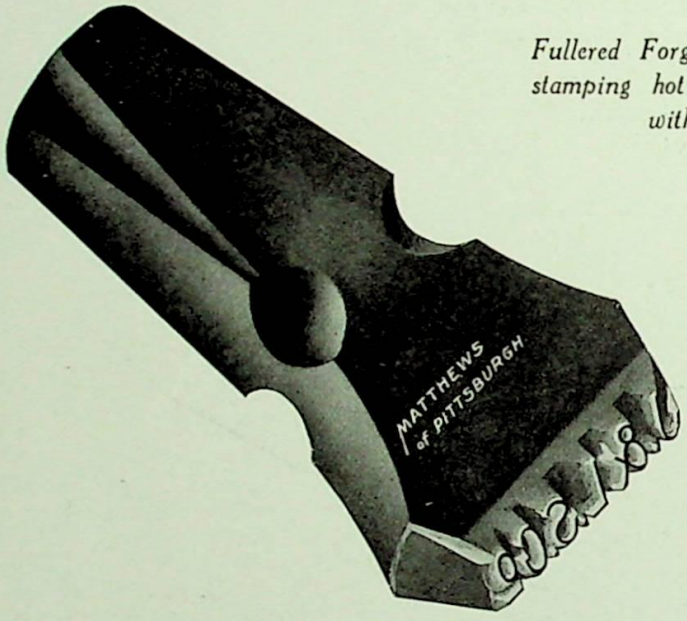
MATTHEWS' FULLERED FORGING STEEL HAND STAMPS

This style of stamp, forged in our own forging department, is used with a wire handle for stamping hot or cold metals, or for extra heavy work. The grooves at each corner illustrate where the wire handles are attached when ready for marking. Prices are the same as the eye forging steel stamps listed on opposite page. Refer to this list when ordering fullered forging steel stamps.

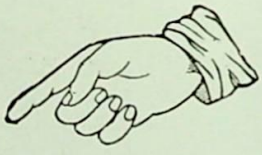


Fullered Forging Hand Stamp for stamping hot or cold metal, used with wire handle

THE DENVER ROCK DRILL MFG. COMPANY OF DENVER, COL.

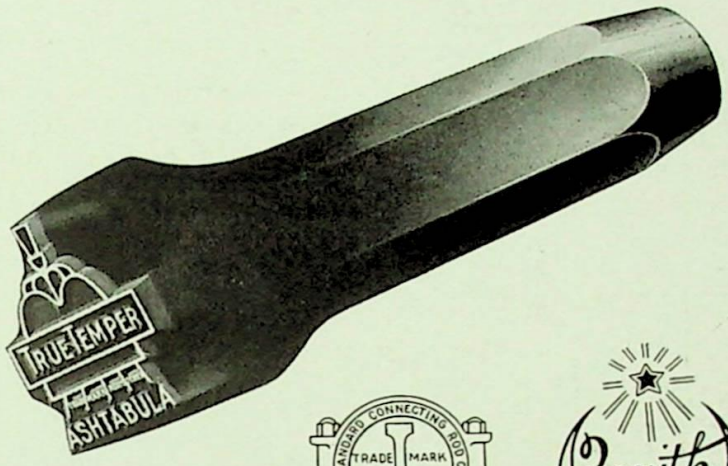
write us as follows about our PITTSBURGH BEVEL HAND-MADE STEEL LETTERS AND FIGURES:

"The steel letters and figures, per our order 9168, have been received, and are glad to tell you they are the best, judging from general appearances and first usage, that we have ever been able to buy. If they continue to prove as satisfactory there will be many more which we will place our orders for."



Letters like this are always shown to our die cutters. "It is nice," they always say, "to know that good work is appreciated. It makes it easier to always turn out a good job"

MATTHEWS' TRADE-MARK AND SYMBOL STEEL STAMPS

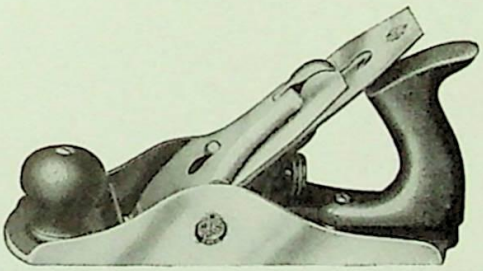


STANDARD CONNECTING ROD CO. TRADE MARK BEAVER FALLS, PA.

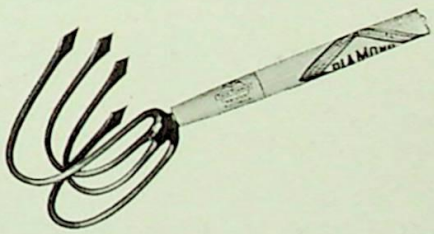
Zenith M.W.H.CO.

TRUE TEMPER ASHTABULA

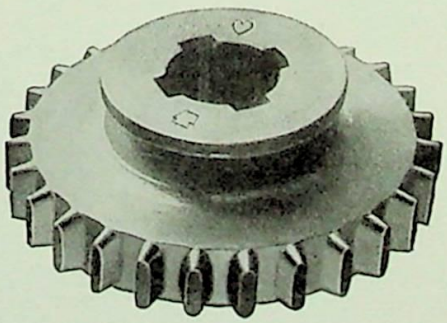
The cutting of trade-mark and symbol steel stamps requires the skilled hands and eyes of careful workmen. This character of work is one of our particular specialties, the kind our workmen like to do because of the satisfaction of turning out a first-class job. We are prepared to furnish steel dies and stamps for marking trade-mark designs, also steel stamps for marking symbol designs.

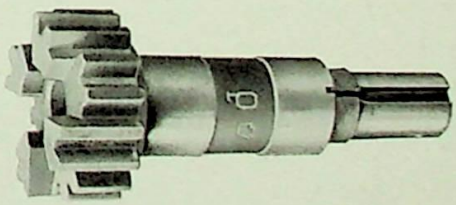


Identifying a popular plane by stamping the trade-mark with a Matthews' Steel Stamp



Aiding the sale of a good hoe by marking trade-mark design with a Matthews' Steel Stamp

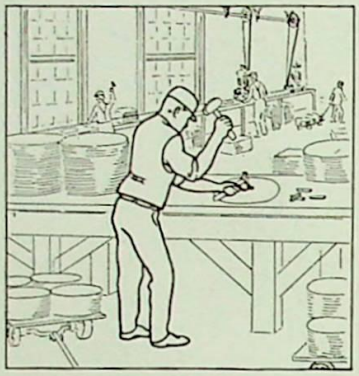




Two automobile gears readily identified by marking symbol designs with Matthews' Steel Stamps

CHANGEABLE STEEL TYPE AND HOLDERS

FOR MARKING HOT OR COLD METALS



Numbering parts with the Matthews' holder and type

The "VICTOR" changeable steel holder and type is particularly adapted for stamping heavy or rough work and will mark both hot and cold metals. It can also be used to good advantage for marking, lettering or numbering machinery, steel bars, parts in process of manufacture, etc. Made to hold three to six letters or figures in sizes $\frac{1}{4}$ to $\frac{1}{2}$-inch. We build to order special holders and type for larger sizes.

"VICTOR" HOLDERS ARE MADE IN THREE STYLES

Victor No. 1 Regular Hand Stamp Style.
Victor No. 2 Fullered Forging Style.
Victor No. 3 Eye Forging as illustrated.

HOLDERS

3 or 4 Characters		5 or 6 Characters	
$\frac{1}{4}$ in. type	$8.50	$\frac{1}{4}$ in. type	$9.50

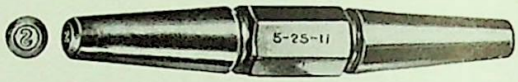
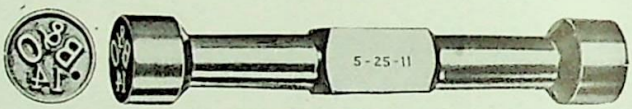
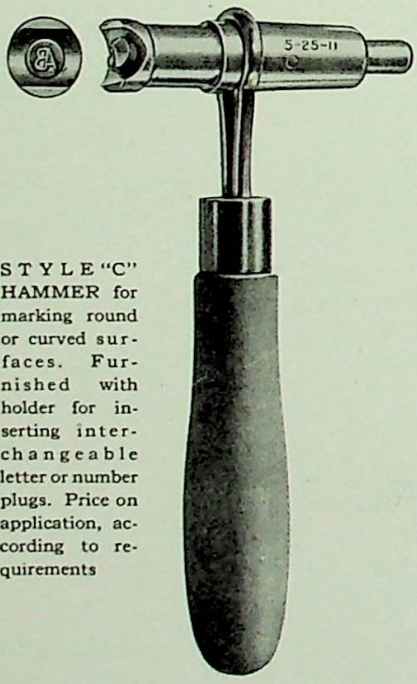
Same Price as Style F. Hammer
Lettered on one end only
Size of space for lettering 5/16 inch



No. D. HAMMER, Size, 5¼ inches over all
Same Price as Style F. Hammer
Lettered on one end only
Size of space for lettering 5/16 inch

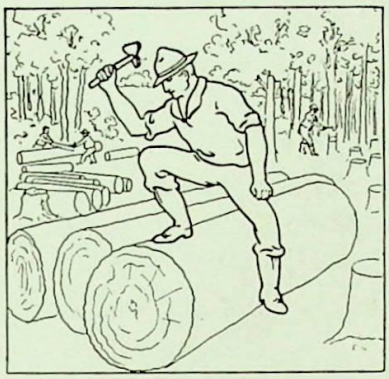


No. B. HAMMER, Size, 7 inches over all
Price on application according to requirements



STYLE "C" HAMMER for marking round or curved surfaces. Furnished with holder for inserting interchangeable letter or number plugs. Price on application, according to requirements

Matthews' Test Inspection Marking Hammers are made of special bar steel. They mark good, clear impressions, and give lengthy service during working use. Hammers can be furnished without handles, or with handles made from best second-growth hickory, taken from the butt and hand-finished. We can furnish any style of marking hammer for test inspection marking on metal or wood. We illustrate a few of the many style hammers we furnish. Style Nos. A, D and F are hammers used for marking inspected metals. Style No. B hammer is used to mark railroad ties and other wood products. Style No. C hammer is used to mark round or curved surfaces and is furnished with a holder for inserting interchangeable plugs.



Stamping Logs

MATTHEWS' STEEL LOG STAMPS

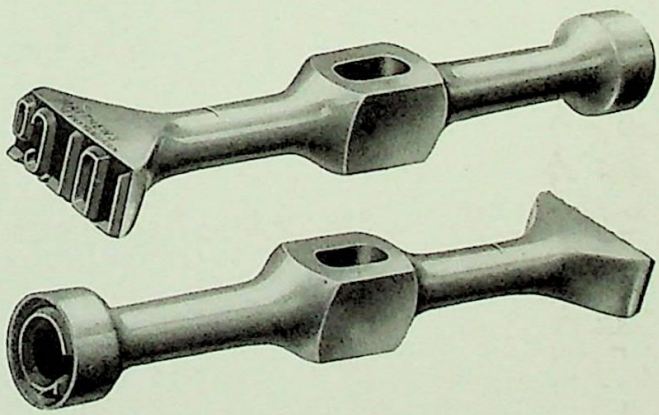
For marking logs, timber, etc.; we make log stamps for cutting into the side of a log with sharp face; for end of log, heavy face as illustrated. Always state, when ordering, if stamp or hammer is to be used for marking the end or the side of log. Matthews' Log Stamps are forged in our own forging department from best warranted steel.

MATTHEWS' LOG STAMPS—PRICE LIST

½ inch	¾ inch	1 inch
1 letter, $1.25	1 letter, $1.50	1 letter, $1.75
2 letter, 1.75	2 letter, 2.25	2 letter, 3.00
3 letter, 2.50	3 letter, 3.25	3 letter, 4.00
4 letter, 3.00	4 letter, 4.00	4 letter, 5.00
1¼ inch	1½ inch	1¾ inch
1 letter, $2.00	1 letter, $2.50	1 letter, $2.75
2 letter, 3.50	2 letter, 3.75	2 letter, 4.50
3 letter, 4.75	3 letter, 5.00	3 letter, 6.00
4 letter, 5.75	4 letter, 6.25	4 letter, 7.50

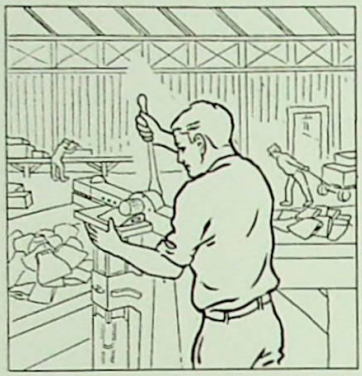
Plain borders, $1.00 per inch, measuring the longest way of border. Price of fancy border depends on design wanted. Prices quoted promptly for larger or smaller size log stamps than are listed, or for stamps with more than 4 letters.

MATTHEWS' SPECIAL LOG MARKING HAMMERS



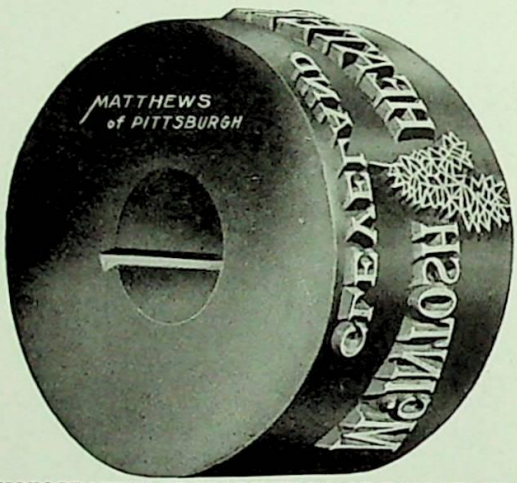
We make to order hammers of this nature with lettering or designs on one or both ends. Prices are figured according to size of hammer and lettering or designs used.

STEEL ROLLER STAMPS



Marking Axes with the Matthews' Roller Stamps

These Roller Steel Stamps represent practical economy in good steel stamping. They are made to attach to the Dwight marking machine when round, flat or odd shaped material is to be marked. When round surface products are to be marked, they can be used on the lathe. This roller stamp method of marking this class of product insures an accurate, uniform and rapid stamping. We make Roller Stamp reproductions of any design. Let us know your wants.



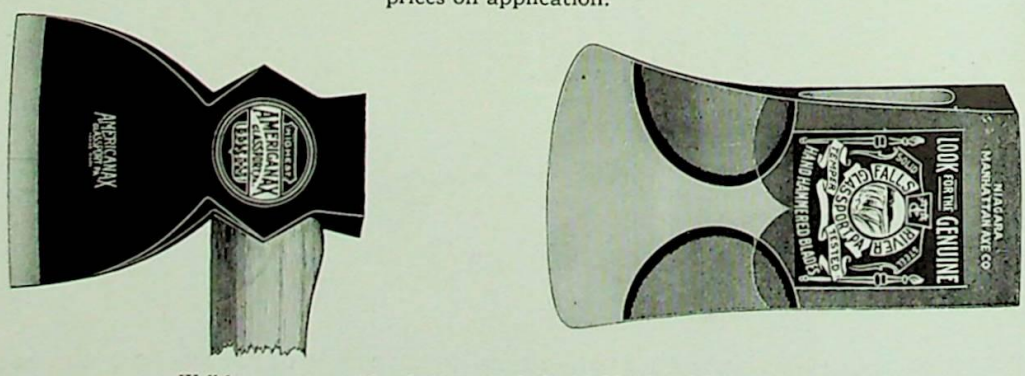
PHOTOGRAPHIC REPRODUCTION OF ROLLER STAMP

PRICES

For Steel Rolls, blank, $1.25 each, plus cost of lettering in the different sized letters, as follows:

1/32 inch	30c per letter	1/8 inch	19c per letter
1/16 inch	20c per letter	3/16 inch	20c per letter
3/32 inch	19c per letter	1/4 inch	25c per letter

These prices are for plain lettering. For rolls having borders or with special designs, prices on application.



Well-known axes and hatchets are marked with Matthews' Roller Stamps

MATTHEWS' HAND-MADE STEEL STENCIL DIES

Cutting a stencil with Matthews' hand-made stencil dies

Nothing better has been made for cutting brass, copper or paper board stencils.

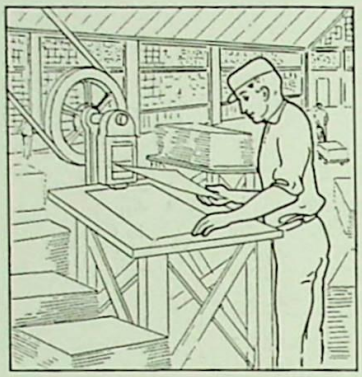
Prices subject to change without notice

We can also furnish either of these grades in special sizes to suit your specific requirements and will be very glad to quote prices upon request.

51501

MATTHEWS' TIN PLATE DIES



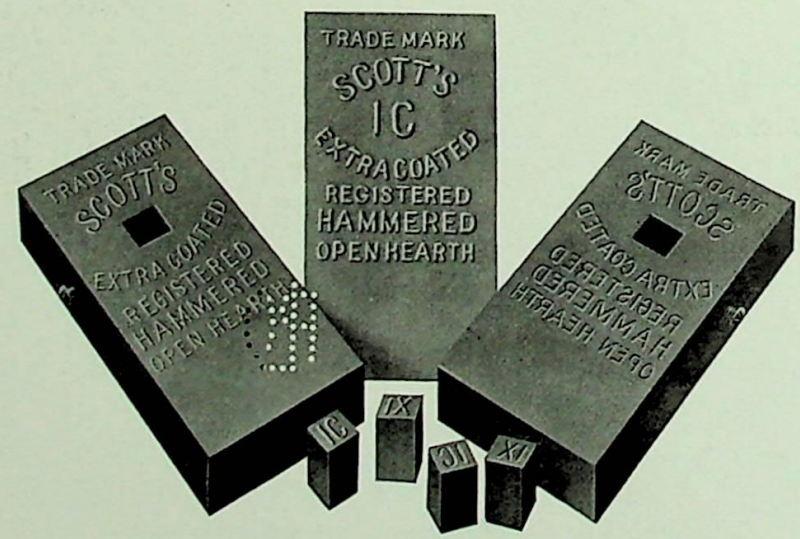
Illustrating how tin plate is marked with Matthews' Tin Plate Dies

These dies are used by tin plate manufacturers for embossing trade-mark and grade on tin plate. They are practically the same as embossing dies, two dies—the sunk letter die and the raised letter die—being necessary to accomplish the stamping. The dies are often plugged for interchanging the grade of the tin plate. Matthews' tin plate dies will not injure the coat of the tin in any way nor will they mar, break or buckle the tin around the lettering. Our illustration shows flat dies, but we can furnish any style of tin plate dies to suit your requirements. The prices of all dies are figured according to size and shape used.

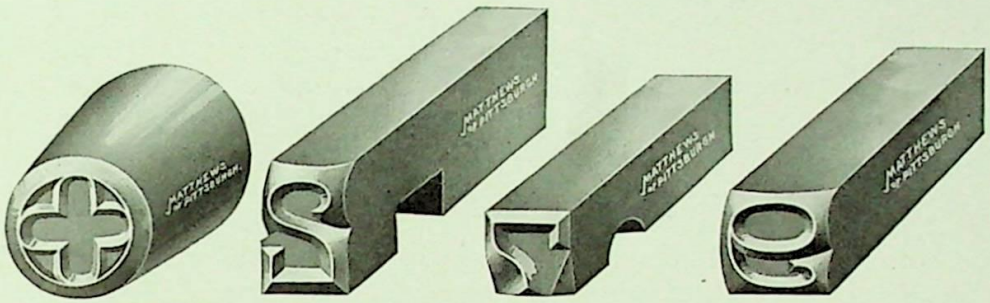
PRICE LIST FOR CUTTING PLAIN LETTERS ON TIN PLATE DIES ARE AS FOLLOWS:

1/4 inch or under	$ .20	5/8 inch	$ .50
5/16 and 3/8	.30	3/4 inch	.70
7/16 and 1/2	.40	1 inch	1.00

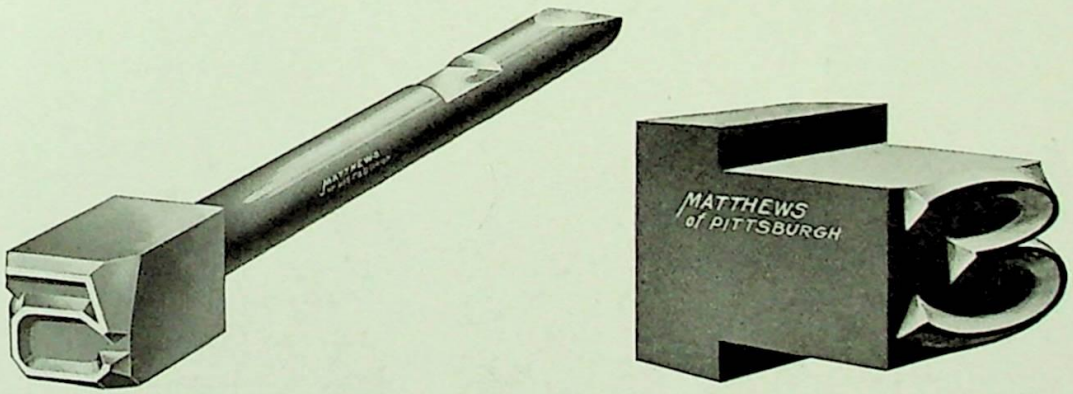
Price of tin plate dies extra depending on the size, shape and design. Dies can be plugged for holding interchangeable grade plug such as IC and IX.



SPECIAL SHAPES IN STEEL STAMPS FOR BILLET MARKING



The steel stamps we illustrate on this page are a few of the many kinds we make for billet marking. They are used generally by steel and iron mills for stamping hot billets and hot rolled plates, such as bars, rails, tubings, structural work, etc. The six styles we illustrate are only a few of the many we make for billet marking and are intended to give you an idea of the wide range of special designs and shapes we make for this purpose. We are prepared to furnish billet markers or special steel stamps of all kinds to suit the individual requirements of any steel mill. Let us know your needs in this direction and we will promptly furnish prices and other information.



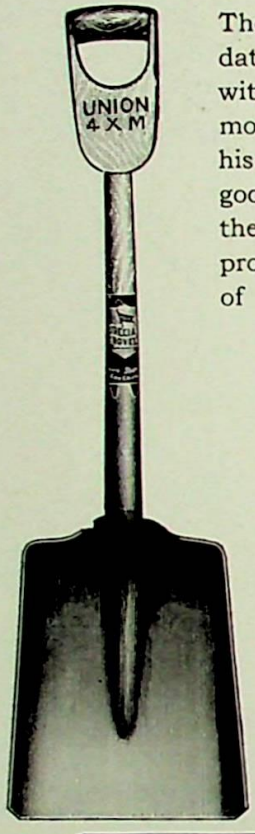
OUR LETTERING DEPARTMENT

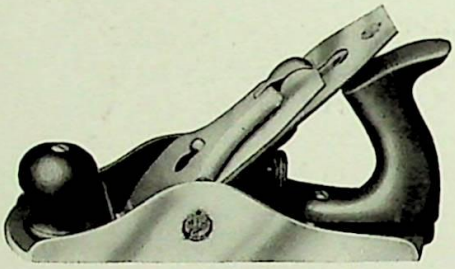
Many firms who make their own dies, die makers, tool makers, etc., send their dies to us for the Lettering and Designing.

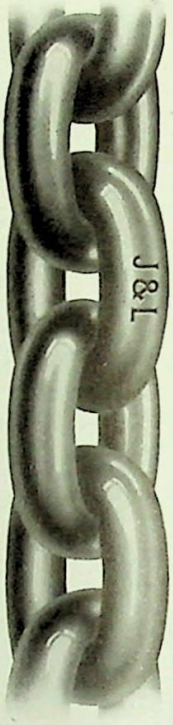
When sending us these orders, please state product to be marked, as we cut the letters or designs accordingly, in order to secure best results on the particular product when reproduced.

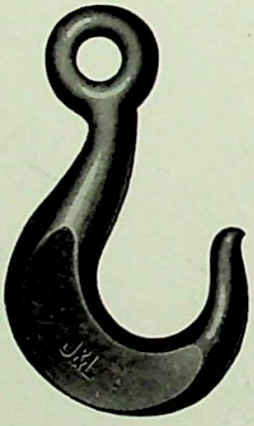
A Product Worth Marking Is Worth Marking Right
The Well-Known Products Of Leading Manufacturers Are Stamped With Matthews' Steel Dies and Stamps

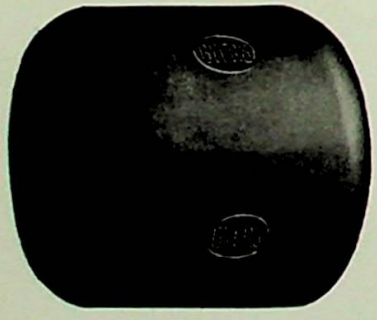
The name or trade-mark of the down to date manufacturer, stamped on his product with a Matthews' steel die or stamp, does more than merely advertise and identify his goods; it raises the selling value of his goods in the eyes of the dealers who handle them, and it shows the consumer the product to ask for *by name.* No other form of good advertising costs so little.

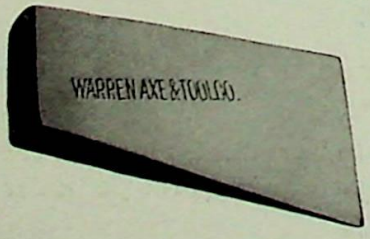


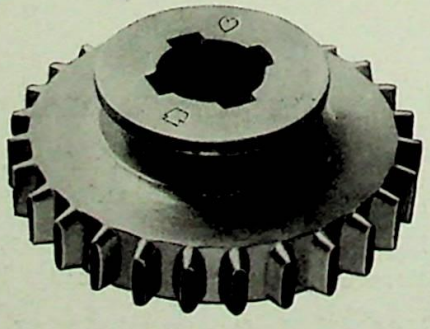




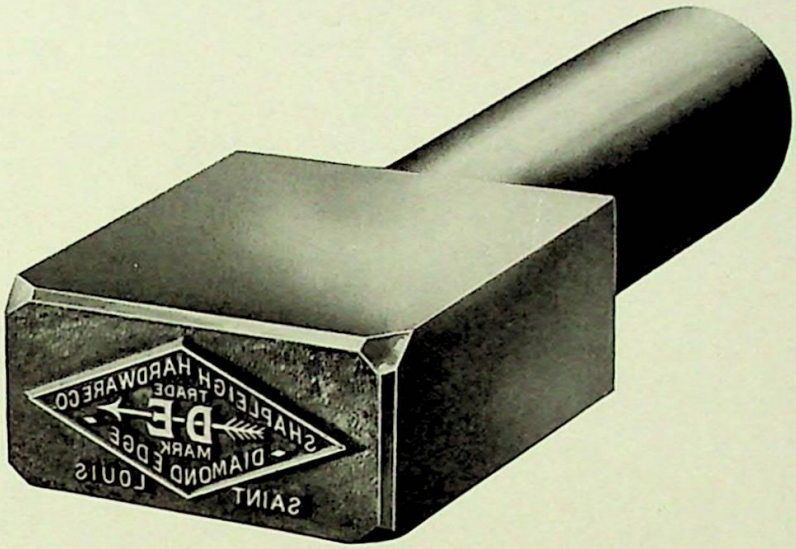




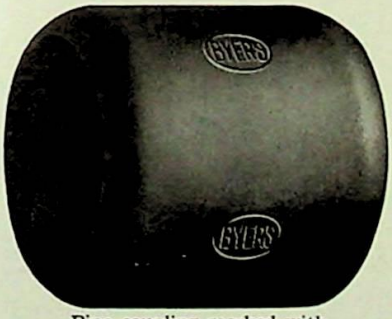




MATTHEWS' STEEL STAMPING DIES



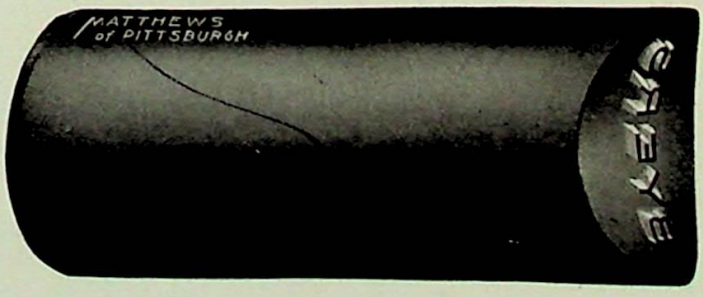
We know how to cut steel stamping dies because we cut a good many of them day in and day out. These dies are made for use in a stamping press and are generally employed where a large quantity of work is to be marked. Notice the clear depth of letters and design on the stamping die reproduced above. We can cut a stamping die for you that will mark your product the maximum number of times and give you a clean marking which will be of advertising value. The price is based on the nature of design, size of die, diameter of shank, etc. Let us figure on your stamping die requirements.



Pipe coupling marked with Matthews' die

A GOOD EXAMPLE OF A SPECIAL MATTHEWS' DIE

The steel die illustrated below was made to insert in pipe rolls. Thus, during the process of manufacturing, the pipe coupling is made and marked in one operation. Write us fully regarding your marking problems. Our experience in *our* business is at the service of *your* business.



Pipe-Mill Die
for marking steel pipe coupling

INTERCHANGEABLE EMBOSSING TYPE

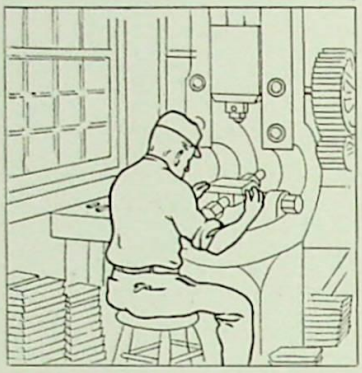


Illustration of the Matthews' embossing type being used on power press

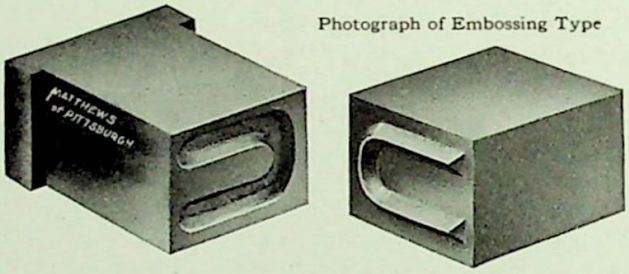
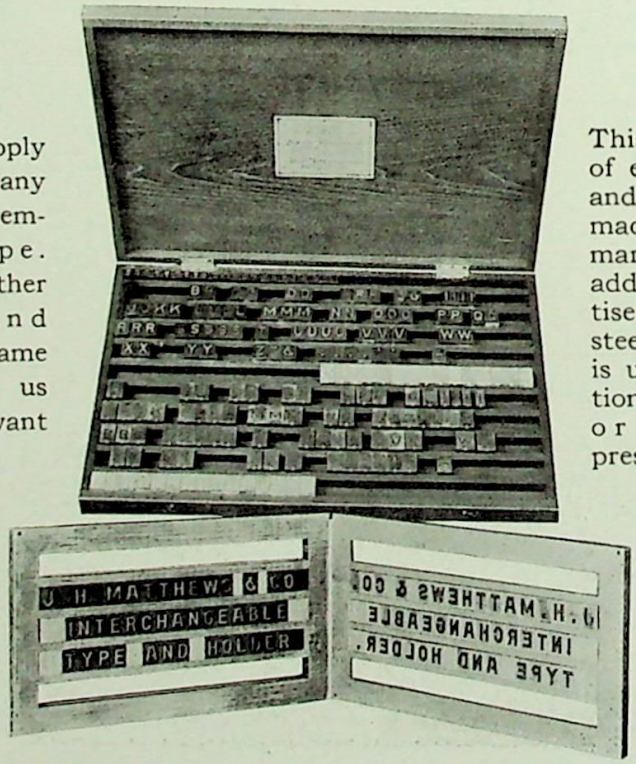
Practical and economical for marking names, addresses, advertisements, etc., on steel packages, steel barrels, metal boxes and other similar products. We make these dies in alphabet sets or individual letters or figures for use on power press similar to corner illustration. We furnish this type with or without holders complete for stamping, ready to adjust to different makes of stamping or power presses. This type readily pays for itself by dispensing with the necessity of continued use of a number of solid steel dies for work of this kind.

Photograph of Embossing Type

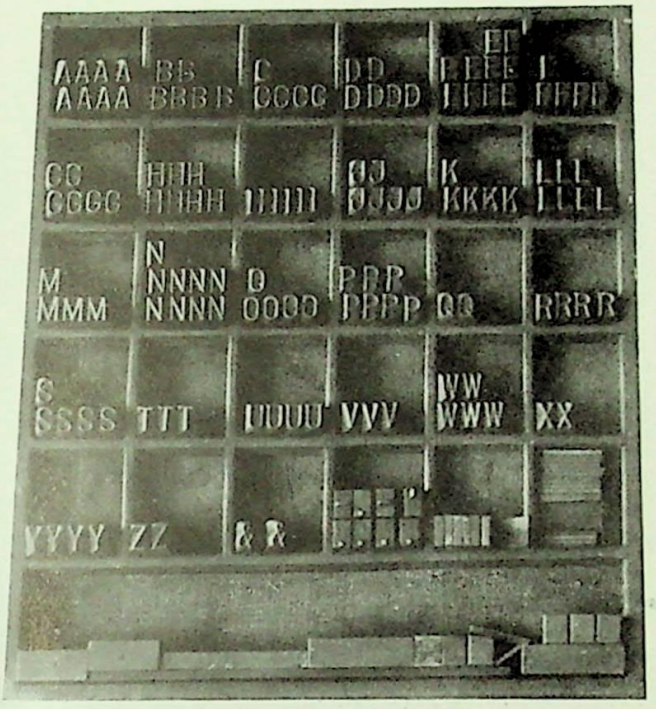


We can supply your wants in any size or style of embossing type. Write for further particulars and prices, at the same time telling us what you want to mark.



This equipment of embossing type and holders was made by us for marking names, addresses, advertisements, etc., on steel barrels and is used in connection with power or stamping press.

ANOTHER ONE OF THE MANY STEEL MARKING OUTFITS MADE BY MATTHEWS OF PITTSBURGH



Illustrating the style and varied assortment of type furnished and the manner in which it is kept ready for any rapid interchangeable marking

Many manufacturers of tin and copper hardware specialties use steel holders and interchangeable steel type for marking on wash boilers and other similar products the name and address of the dealer or jobber who handles their line of goods. The illustration below shows the name and address of a hardware dealer marked with this type and holder on a power stamping press.

While this type stamps an embossed or raised marking, it is different from regular embossing type, only male dies being used instead of male and female type. The embossing is accomplished by placing the male dies in a lower holder and in place of an upper holder a lead platen or press counter is used. The size and style of the upper holder used depends on the nature of the marking, the kind of stamping press used and the size and style of the male type.

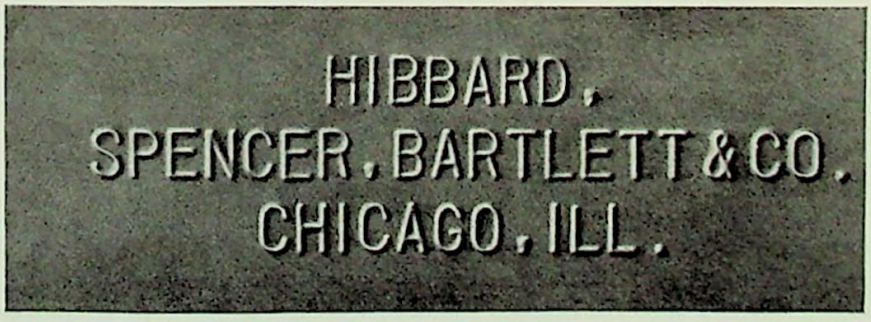


Illustration marked on a copper wash boiler with this holder and type

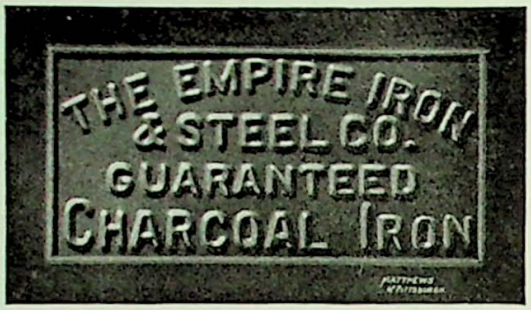
MATTHEWS' STEEL LETTERING EMBOSSING DIES



Photographic Reproduction of Sheet Iron Marked with Matthews' Embossing Dies

Photographic Reproduction of Steel Powder Keg Head Marked with Matthews' Embossing Dies

Matthews' Steel Embossing dies stamp plain lettering or design work equally well. Notice the clean evenness of the lettering we show on this page, representing the work of our plain lettered embossing dies. Price for dies of this nature depends on the shape and size. Price below is for cutting the lettering on the dies like samples shown but in the plain straight line work. Curved lines, script type, old English or fancy designs are extra, according to character of the dies.

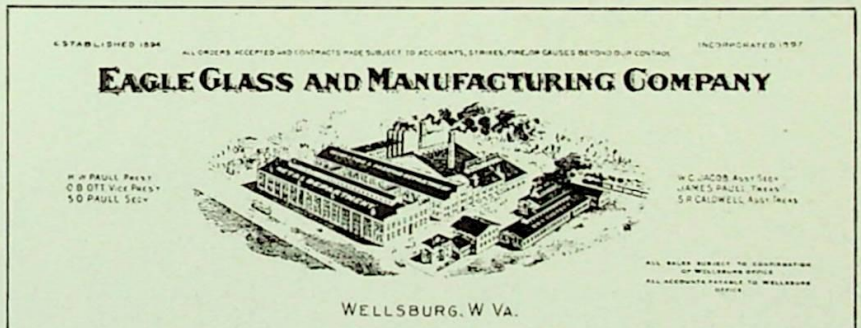
Embossing Jar Caps

STEEL EMBOSSING DIES

For marking an indestructible embossed raised letter or design on tin, sheet iron, sheet steel, metal boxes, powder kegs, jelly tops, can lids, etc. Dies illustrated below are used for embossing jar or jelly caps or lids. Prices for the dies are figured according to the size and shape, design and style of lettering.

MALE AND FEMALE EMBOSSING DIES

CAP MARKED WITH EMBOSSING DIE



EAGLE GLASS AND MANUFACTURING COMPANY

WELLSBURG, W VA.

JAS.H.MATTHEWS & CO. 5/14/13
Pittsburgh,Penn.

Gentlemen:

We beg to advise that we have had a great many embossing dies for our work made by you and the work has been satisfactory and usually executed promptly.

Yours truly,

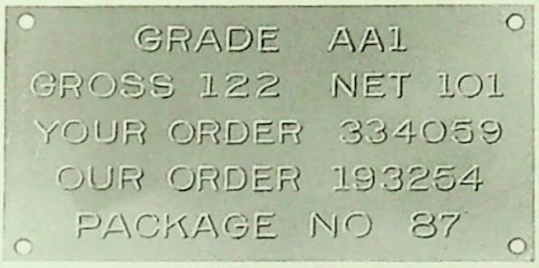
WCJ/F EAGLE GLASS & MFG. CO.

WE HAVE MADE SOME RATHER LARGE STEEL EMBOSSING DIES

The Steel Die used to emboss the above COCA-COLA trade-mark design is one of the largest dies we ever cut for marking heavy metal boxes, and it is a true reproduction of a trade-mark nationally advertised.

This is a photographic reproduction of a design embossed on a large steel barrel with the most massive steel embossing die we ever manufactured—the lettering diameter being 30 inches or 10 to 15 times the size of an ordinary embossing die.

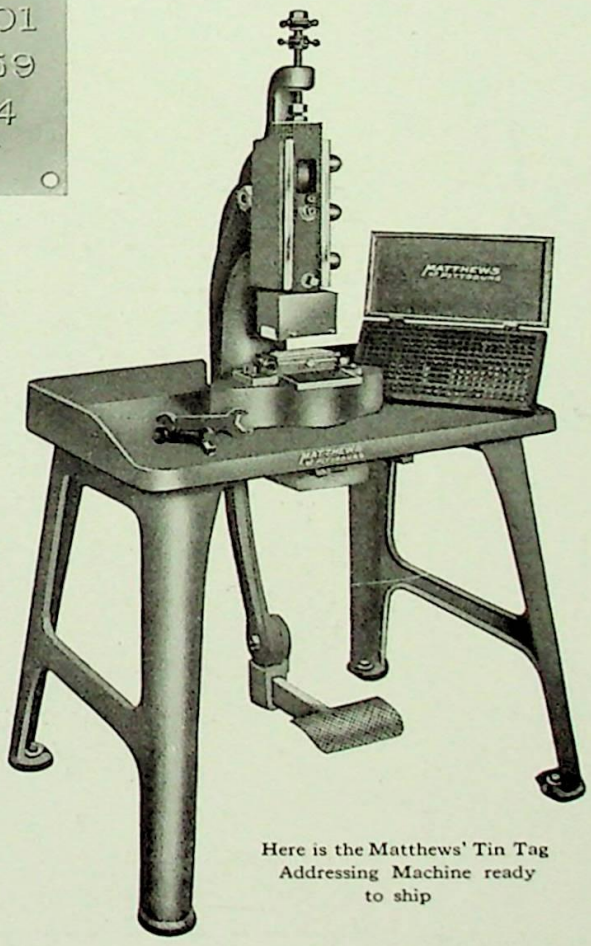
MATTHEWS' TIN TAG ADDRESSING MACHINE



This machine rapidly embosses names, addresses, weight numbers, order numbers, etc., on tin tags or blanks of various sizes. Quick changes can be made as often as desired. Foot press as illustrated, steel holders, and interchangeable type constitute this equipment. If desired, we furnish tags or blanks ready to mark. This machine will easily pay for itself in a short time and will prove a valuable asset to the manufacturer who uses tin tags for labeling or addressing export or domestic shipments. The tin tags, besides being more durable than linen ones, are not easily lost in transit. This machine is now being successfully used by a number of manufacturers for the purpose above described.

Addressing tin tags with the Matthews' Tag Marker Machine

Three reduced illustrations of tin tags marked with the Matthews' Addressing Machine. Actual size of type, 3/16-inch.



Here is the Matthews' Tin Tag Addressing Machine ready to ship

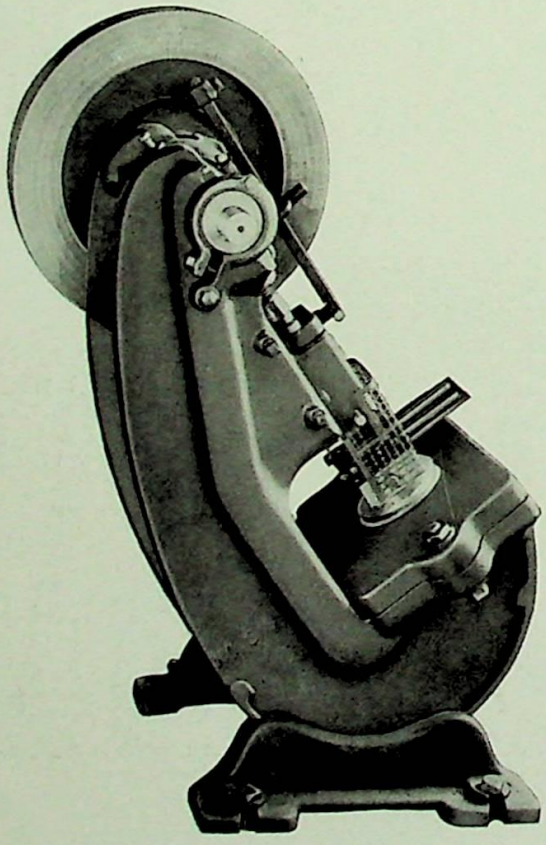
MATTHEWS' SEMI-AUTOMATIC TAG MARKING MACHINE

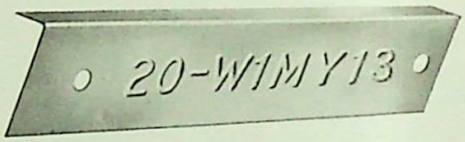
FOR TYPE EMBOSSING OF TIN TAGS, ETC.

Designed for rapid embossing of tin tags, this semi-automatic marking machine is used in the following manner by a manufacturer of metal sash frames and skylights. Shop orders are given to the operator with complete information that is to be embossed on the tin tag. The operator then sets the type in the holders and embosses as many tin tags as there are pieces of material on the order. These tags are then placed in an envelope and fastened to the order—the order passing to the shops for assembling.

Manufacturers, who have a number of different parts being made on one order, will find a machine of this nature profitable to use, as the tin tags, after being marked, can be attached to the various parts as manufactured so as to be readily identified and assembled when the order is completed.

As illustrated, the tags are fed into the feed slot and a large quantity can be quickly marked. When one lot of tags is marked the type is easily changed for the next lot of tags, etc. This machine can be adapted to a number of different uses for embossing tin tags. Price depends on assortment of type used and nature of marking. Further facts on request.





As an example, the tag illustrated above denotes the following: "20" Shop Order, "W," location of the job, "I," method of shipment, "M," floor of the building on which the metal frames or skylights are to be erected, "Y," location of the floor, "I," pitch of the building and "3," the date of shipment.

A PRODUCT WORTH MARKING IS WORTH MARKING RIGHT

Using a Matthews' Steel Hand Stamp

THERE'S A MATTHEWS' STEEL STAMP FOR MARKING MOST EVERY PRODUCT

Almost every product made of wood, steel, leather, iron, tin, brass, aluminum or other material is capable of being properly marked by using a Matthews' Steel Stamp or Steel Die. If you have a product worth marking, worth identifying and advertising, it is worth marking right. Get in touch with our steel die department and rest assured that your product will be properly stamped with the right kind of a die.

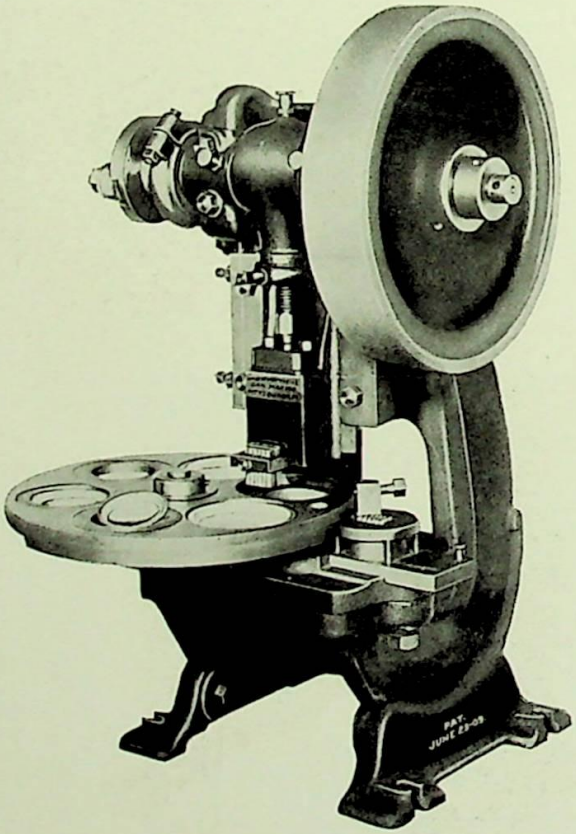
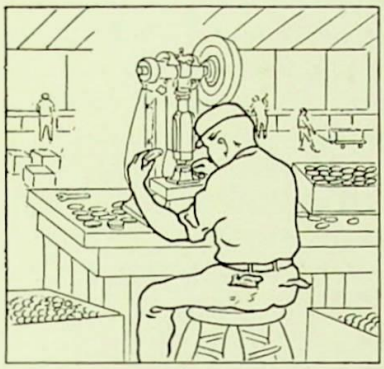
MATTHEWS' SEMI-AUTOMATIC CAN MARKING MACHINE FOR MARKING DIFFERENT SIZES OF CAN LIDS, PAIL LIDS AND TIN TOPS

This is another one of the marking machines made by Matthews of Pittsburgh. It consists of a well-built power press made with steel upper and lower holders, and a round steel disc as illustrated. The holders are arranged for receiving the embossing type of either letters or figures while the round steel discs are made interchangeable to hold different sized lids, allowing for rapid semi-automatic marking. Further particulars gladly furnished.

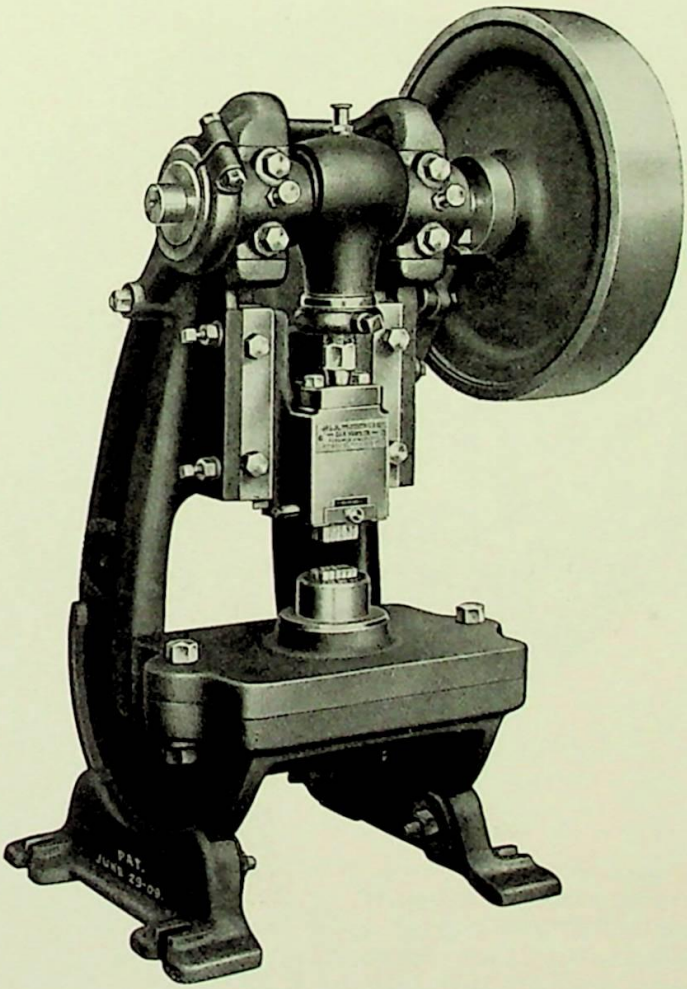


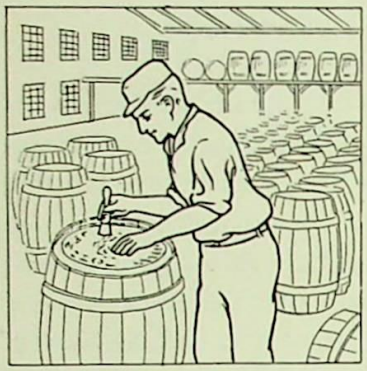
MATTHEWS' CAN-MARKING MACHINE



Showing machine in operation

This Patented Marking Machine consists of stamping press with holders and interchangeable steel type. This machine is used for embossing letters and figures on all kinds of can lids, pail lids, and similar tin products that require numbering or lettering. These machines are now being extensively used by leading paint and varnish manufacturers in the United States and Canada. Further facts and particulars gladly furnished.





Stenciling barrels

BRASS AND COPPER STENCILS

We make every variety and style of stencil from carefully selected brass and copper. We illustrate on this and the next 6 pages some of the work of our stencil department. These pages will give you an inkling of some of the many purposes for which stencils are used. Our pictorial book, "STENCILS AND WHAT THEY ARE USED FOR," is ready for mailing. Ask us to send a copy to your purchasing and shipping departments.

You should use your boxes to advertise your products as well as to pack your goods. A good advertisement, in stencil form, will bring wide publicity to your product, as boxes travel extensively, in fact, they are practically traveling bill-boards. Good advertisements of your products, in stencil form, used on your boxes will aid your business. The best advertising results come from changeable copy. Vary your stencil copy. We will help you. Send for our illustrated booklet "Making Boxes Pay For Themselves," which says some interesting things about the value of box publicity to box users.

STENCILS FOR THE SHIPPING ROOM

The Shipper Marks Rapidly with the Matthews' Stencils

A stencil for every marking emergency should be in handy readiness in every shipping room. Stencils that will answer every need of the shipper will be found illustrated on the following pages. Time lost in the shipping room because of inefficient stencil equipment means delay in shipments. Ask your shipper to look over our line of shipping room stencils. A copy of our illustrated book, "STENCILS AND WHAT THEY ARE USED FOR," is ready for mailing.

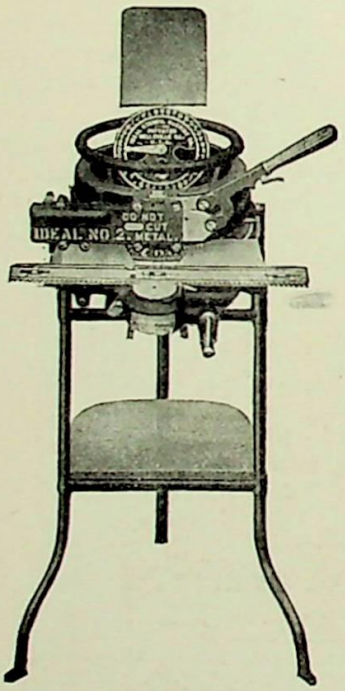
NO SHIPPING ROOM IS COMPLETE WITHOUT THE IDEAL

IDEAL

Illustrating exact size and style of characters cut on the No. 2 IDEAL

IDEAL

Illustrating exact size and style of characters cut on the No. 1 IDEAL



Stand extra.

IDEAL Stencils can be used for marking wooden or paper boxes, crates, barrels, burlap bags, flour sacks, lumber, iron, steel or other metals, or any surface where hand marking is used or a tag affixed.

The Stencil is not taken out and replaced by hand after each line is cut, as on all other machines. Merely press two levers and the cutting continues. Moving the Stencil to the next line and bringing it back to the starting point, by pressing the two levers, requires but an instant.

ACCURACY IN MARKING is what you ought to have in your Shipping Department.

The Stencils cut by the Ideal are proof that each shipment has been properly marked and that it will reach your customer without loss or delay.

Accurately marked shipments—elimination of losses and delays—a saving of time and expense—are what the Ideal will give you.

GUARANTEE

IDEAL Stencil Cutting Machines are guaranteed to be perfect in Operation, Construction, Material, and Workmanship.

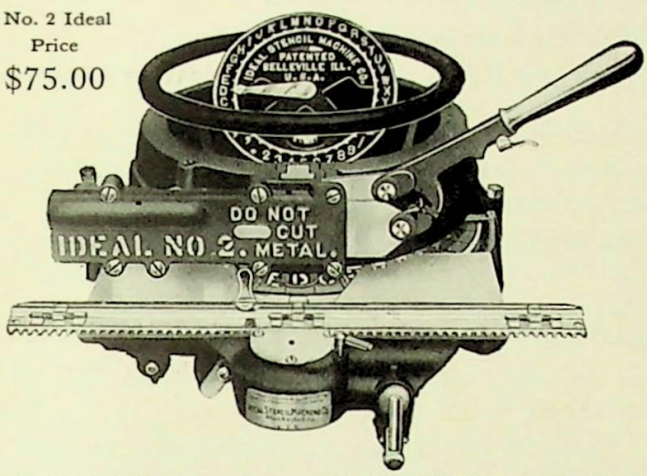
Any defective part will be replaced free of all cost to the original purchaser during the life of the machine.

HOW YOU CAN TEST THE IDEAL MACHINE

We will install an IDEAL Stencil Cutting Machine with you for your trial and inspection, allowing you the privilege of cutting stencils for marking your shipments. Write for our booklet and special trial offer.

THESE IDEAL STENCIL MACHINES WILL INTEREST YOU

No. 2 Ideal
Price
$75.00



The No. 2 IDEAL cuts characters FIVE-EIGHTHS OF AN INCH HIGH and from one to four lines. Size of machine is 18 inches long, 16 inches wide and 10 inches high. Weight, 75 lbs.

Complete equipment included with each machine, consisting of Stencil Board, Marking Pot, Stencil Brush, supply of IDEAL Ink, can of Oil and Operating Instructions.

WE WILL DELIVER THIS COMPLETE IDEAL STENCIL CUTTING MACHINE TO YOUR SHIPPING DEPARTMENT FOR $75.00.

You can depend on the New Automatic IDEAL STENCIL CUTTING MACHINES. They were made perfect before they were placed on the market. The large number of satisfied users prove that the IDEAL is perfect, for severe and constant use. It will replace the old method of hand marking—and will make the Shipping Department ACCURATE, SPEEDY and UP-TO-DATE.

The IDEAL is the only real VISIBLE Stencil Cutting Machine on the market. This is a great improvement over the old-style machines where the characters are not cut in plain view of the operator.

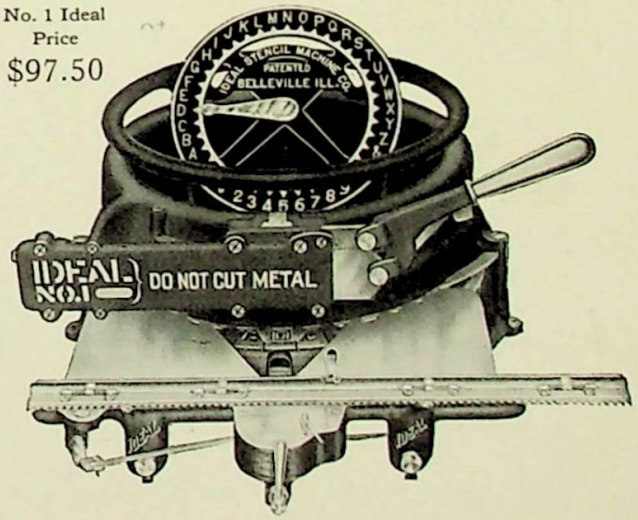
On the IDEAL, the operator can plainly see every character he cuts. This eliminates all possible chance of making errors, which is a great saving of Stencil Board and of the operator's time.

ACCURACY and SPEED are the two most desirable qualities in a good Stencil Cutting Machine. Accuracy and Speed in their highest perfection are what you get in the New Improved Automatic IDEAL.

The ACCURATE SPACING DEVICE, a simple mechanism, which is used exclusively on the IDEAL, produces EXACT and ACCURATE spaces between characters. This device has replaced the Inaccurate Friction Feed on the old-style machines.

Comparative tests showed that there was absolutely no difference in the spacing when the machine was operated at a speed of five letters per second, or when operated with a slow and even stroke.

No. 1 Ideal
Price
$97.50



The No. 1 IDEAL cuts ONE INCH CHARACTERS, and from one to four lines.
Size of machine is 23 inches long, 21 inches wide and 13 inches high. Weight, 125 lbs.
Complete equipment included with each machine, consisting of Stencil Board, Marking Pot, Stencil Brush, supply of IDEAL Ink, can of Oil and Operating Instructions.

YOU CAN AUTHORIZE US TO SHIP THIS COMPLETE IDEAL MACHINE TO YOUR SHIPPING DEPARTMENT FOR $97.50.

PATTERN LETTERS AND FIGURES

DESCRIPTION OF ILLUSTRATED STYLES

Style 69 Roman—A standard and favorite style. Flat face.

Style 80 Sharp Face Gothic—The leading style. They are all draft and draw perfectly from the sand.

Style 71 Flattened Face Sharp Gothic—Made from 80 by filing off the faces.

Style 72 Flat Gothic—This letter same style as 71, but about one-half thickness.

Style 75 Hair Line Gothic—A very light letter.

Style 90 Doric—An oval face letter and very desirable.

Style 40 Deep Block—Thicker than 71 and desirable for heavy work or tablets.

Style 92 Round Face Gothic—Heavier than 80; adapted for heavy work.

Style 52 Condensed Thin Roman—More condensed and thinner than 69.

Style 96 Flat Face Gothic No. 1—Thin letter, flat face. Thinner than 71.

Style 76 Fancy—An ornamental letter with flat face.

Style 78 Reversed Sharp Gothic—Same as 80 excepting that they are reversed. Used for lettering soft cement work.

Style 81 Condensed Gothic Brands—A reversed letter, 5-16 inch deep. Used for patterns for iron or copper burning brands.

Style 82 Reversed Roman Brands—A reversed letter, one-half the thickness of 81. Used for Babbitt metal moulds, Brick moulds, etc.

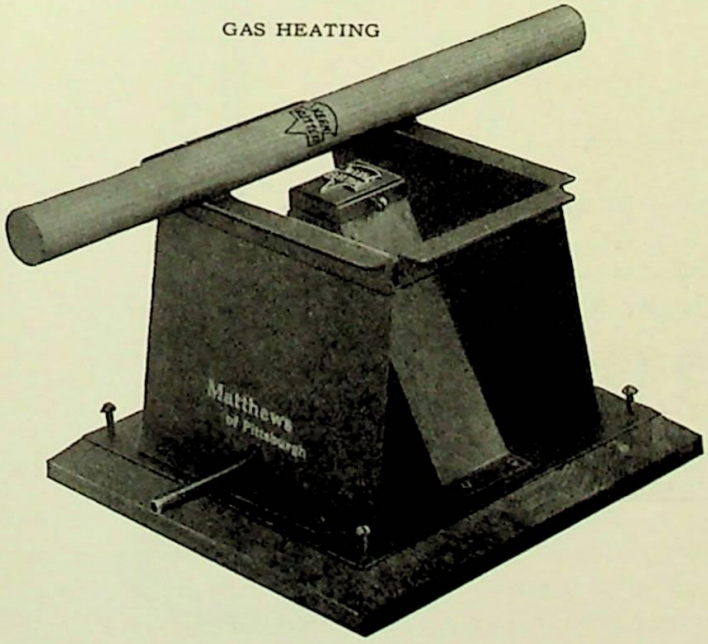
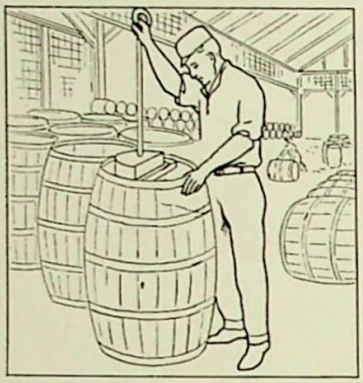
MATTHEWS' NEW BURNING BRAND OUTFIT

GAS HEATING



A new idea in a burning brand for marking round handles and other wooden objects having a round surface. As illustrated, the article to be branded is simply rolled over the heated brand, which is made on the same order as a steel die. Write for further particulars and prices, with description of article to be marked, also the lettering or design.

THE BEST IN BURNING BRANDS



Marking distillery barrels with a Matthews' Burning Brand

On this and the following two pages will be found the best in burning brand equipment. Our burning brands are made to reproduce deep, true imprints on barrels, boxes, cases, tubs, tool handles, wheelbarrows, poles and other wood products of like nature requiring brand marking. We make our burning brand designs, letters, numbers, etc. from Cast Iron or Copper. When not otherwise specified, we make them of cast iron.

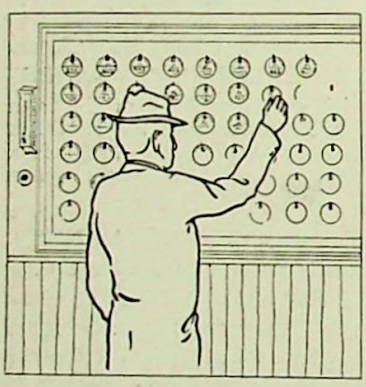
THE MATTHEWS' LINE OF CHECKS AND BADGES

The illustrations of our checks and badges shown on the following pages give but a small idea of the work of our Check Department. Our Special Illustrated Check Catalog is a book that we want to send you. It illustrates many new ideas in time checks, pay checks, tool checks, trade checks, mining checks, mill checks, factory checks, badges of all kinds, in fact, almost every class of check or metal badge is illustrated in this special check catalog. Write us to-day to send you a copy. It is worth having on file.

In many mills and factories Matthews' Brass Pay Checks are used.

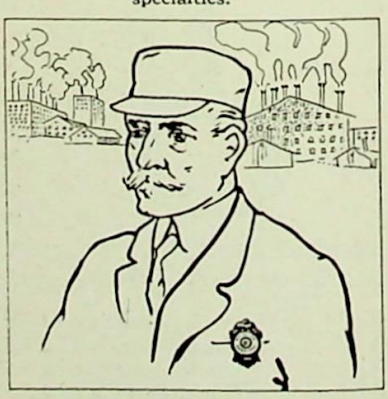
Many firms systematically keep track of their tools by using Matthews' Checks



The use of brass checks for recording employees' time is much in favor.

The making of Commissary or trade checks is one of our particular specialties.

Every check user should investigate the Matthews' New Style Check Hook.



We are prepared to furnish watchman, and special police, badges of all kinds

GOOD SHAPES IN TIME AND PAY CHECKS

The time and pay checks, illustrated on this and the following six pages, represent standard shapes and sizes in brass checks used for time and pay roll keeping. Look these pages over when selecting your requirements. You'll find a variety of styles and shapes with reading matter which we believe will prove of suggestive value in aiding you to decide what lettering to place on your time or pay checks. All Matthews' checks are carefully and neatly lettered and made from brass. Any of the checks shown on this page can be furnished lettered or numbered, to suit your requirements at the following prices.

QUANTITY	BLANKS	Lettered only or Numbered only	Lettered and Numbered
50	$ .50	$1.00	$1.25
100	.80	1.55	2.05
200	1.30	2.25	2.95

Checks filled with jet black enamel, 50c a hundred, extra. Please order by number.

MATTHEWS' NEW RAISED LETTER CHECKS

Made on the same principle as coined money, thus minimizing to a certainty any chance of duplication. We not only emboss reading matter on both sides in clear, bold, raised letters, but we can, if desired, emboss your trade-mark also. On account of their greater security for time and pay-roll purposes, they are far more preferable than the old style sunk letter plain check which offers more possibility for duplication. This reading matter is on reverse side of all checks, "Loss of this check should be reported to time dept. immediately. A charge of 50c will be made if lost or not returned on leaving the services of the company."

Price list for raised letter checks, illustrated below, lettered and numbered on both sides.

100	$8.00
200	10.50
300	13.00
400	15.50
500	18.00
1000	30.00

MATTHEWS' TRADE-MARK TIME AND PAY CHECKS

Because many manufacturers have desired to secure a time and pay check that would be distinctly their own and entirely different from other checks used for time and pay roll keeping, we have designed the Matthews' Trade-mark Checks. We can furnish you a brass time or pay check in any size or shape illustrated in this catalog and place upon the check your trade-mark, cut of your factory building, or any other similar design. This offers you the opportunity to secure a distinctive check that will be very hard to duplicate. Let us know the size, shape and quantity of checks you desire and the design or trade-mark you want and we will promptly quote you on your requirements.

COMMISSARY TRADE CHECKS

RAISED LETTERS

On this and the opposite page we illustrate standard sizes, shapes and designs of brass or aluminum trade checks. Any of the shapes and sizes shown on these pages can be furnished at prices listed below. These prices cover check having your firm name or address on one side and on the reverse side the wording "GOOD FOR 5c IN TRADE" or "GOOD FOR 5c IN MERCHANDISE" in the various denominations illustrated. Matthews' trade checks are neatly embossed in clear, legible, raised letters.

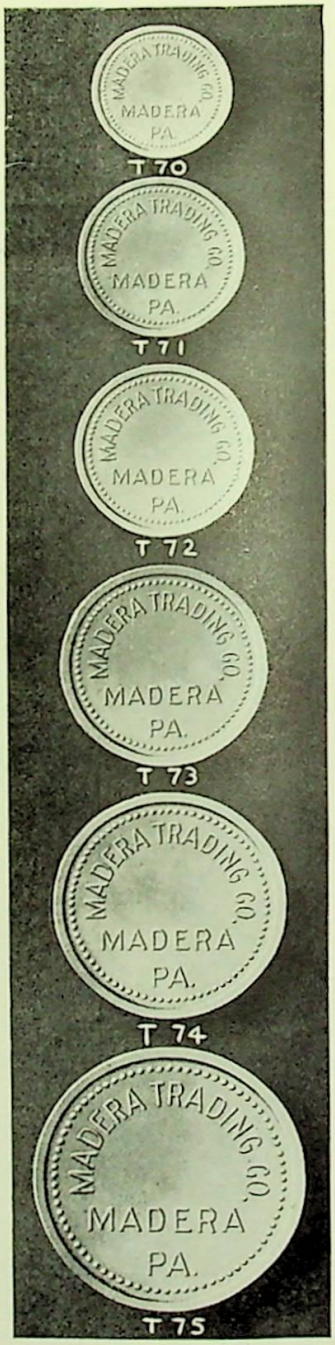
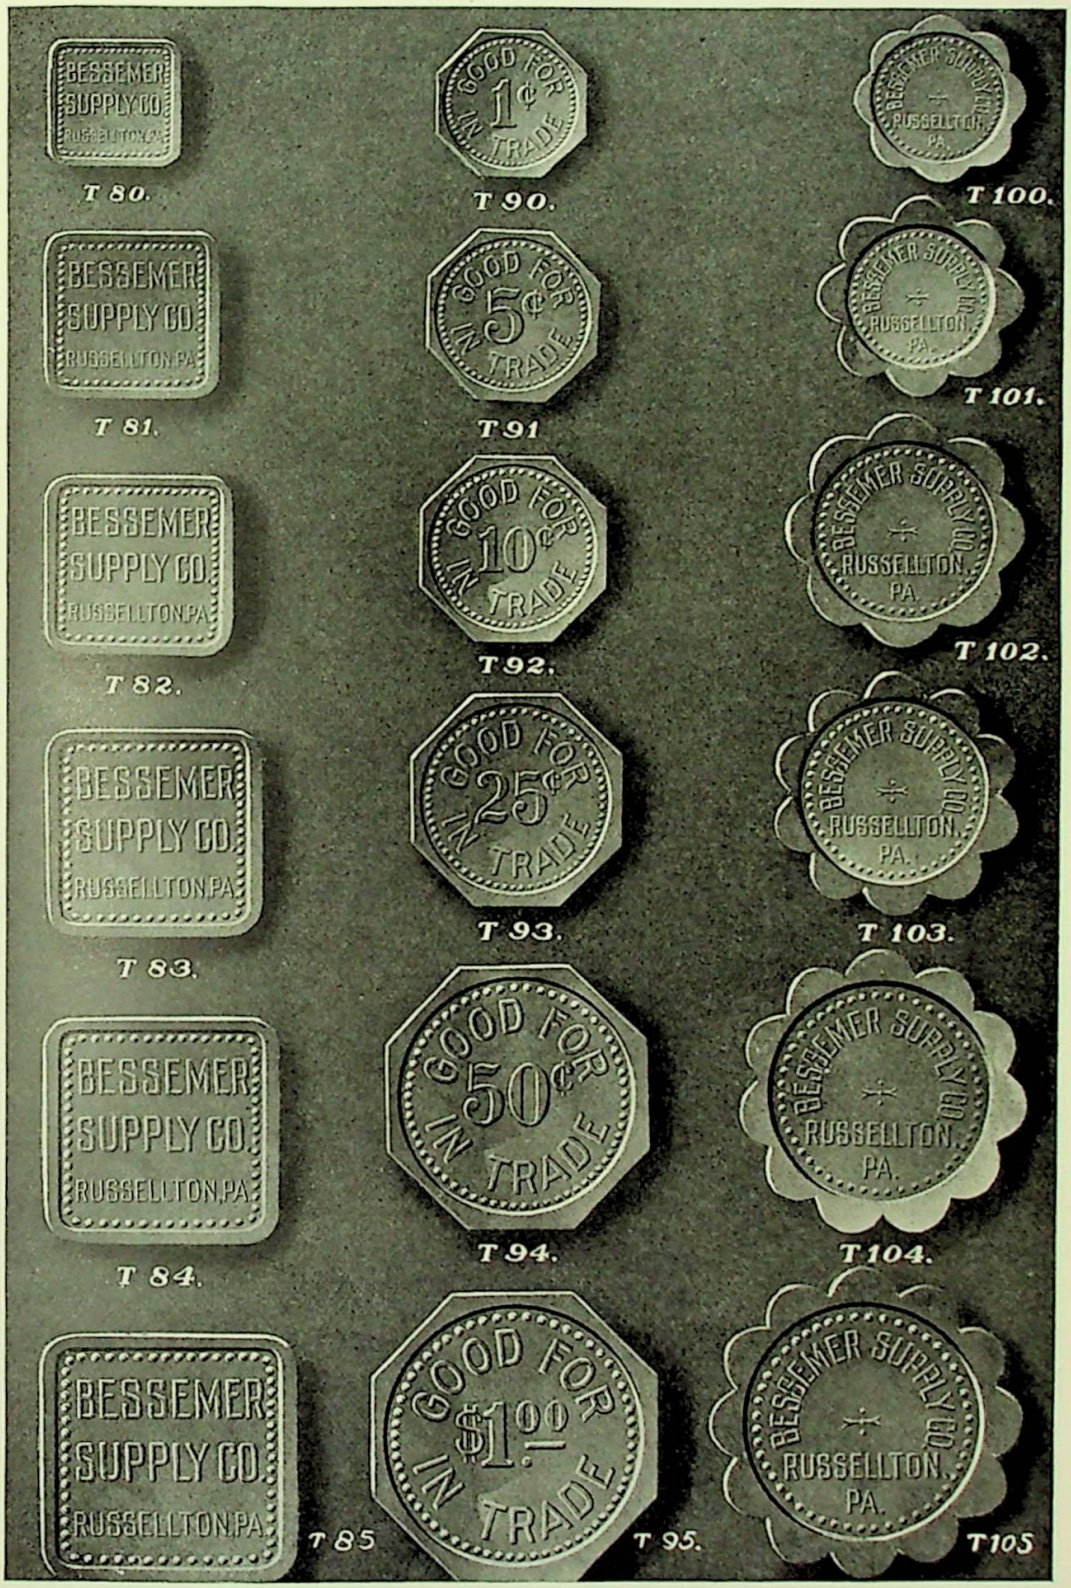
We cannot accept orders for less than 100 checks.



ADDITIONAL SHAPES IN TRADE CHECKS



TRADE OR COMMISSARY CHECKS

We are prepared to furnish trade checks for every purpose.

A PAGE OF SPECIAL TRADE CHECKS

On this page we illustrate bottle checks used by brewers and hotels to insure the return of bottles from their customers. The third, fourth and fifth checks on left are raised letter bottle checks stamped on both sides. Checks on right are sunk letter bottle checks stamped on one side only. We can furnish trade checks for lodge rooms, cafes, pool rooms, milk and bread checks, as illustrated. Any of the checks on this page lettered to suit requirements furnished at the following prices.

TOOL CHECKS AND HOW TO USE THEM

CHECKING TOOLS OUT TO WORKMEN

(Reprinted from Iron Age, Sept. 4th, 1913)

In issuing the tools, a check must be given by the workman for every piece. However, as in many cases where a large number of items of the same symbol are issued, such as holding-down bolts, this would result in the use of an inordinately large number of checks being handled on one order, what are known as "denominational checks" are used. These are checks bearing on one side the workman's number, and on the other a large figure, as 3, 5 or 10, which indicates that it is equivalent to that many of the single checks. These denominational checks are different in shape from the single checks, so that the tool room attendant knows immediately on handling it that it calls for more than one item to be returned.

When tools are returned to the tool room, after use in the shop, they are first inspected, and if in need of repairs are sent to the proper department. In case repairs are necessary, a repair check, which is simply a brass tag with a large R stamped on it, replaces the workman's check on the compartment where the tool belongs. When the tool is returned, it is replaced in the rack and the repair check removed. It is thus possible to tell exactly where each tool belonging in any given compartment is.

In checking out tools, either the single check or double check system may be used. With the former, when a tool is issued, the workman's check replaces it in the tool compartment. With the double check system, a board is provided on which are a series of hooks, each bearing a workman's number. When a tool is issued, the workman's check replaces the tool as before, but in addition, a check bearing the tool symbol is placed on the hook bearing the workman's number on the board. Thus it is possible to tell at any time just what tools a workman has in his possession. This is of value if a man leaves, or is transferred to another department of a large works, and although the double check system may at first glance appear cumbrous, it in reality involves little or no more work than the single check system.

MATTHEWS' BRASS TOOL CHECKS

QUANTITY	PLAIN	Lettered only or Numbered only	Lettered and Numbered
50	$ .50	$1.00	$1.25
100	.80	1.55	2.05

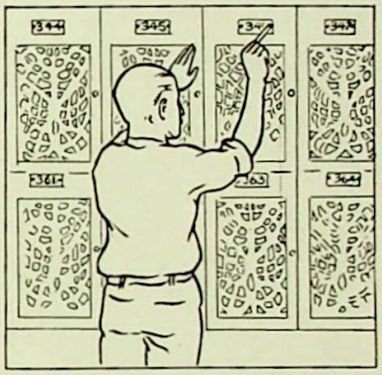
MATTHEWS' NAME AND NUMBER PLATES, TIN TAGS AND BRASS LABELS

For Advertising and Identification Purposes

On the following pages we illustrate some of the work of our name and number plate department. A look through these pages will reveal a great variety of name and number plates, brass labels and tin tags that represent the best method of advertising and identifying a large number of different products. WE GIVE OUR SPECIAL ATTENTION to the design, the reading matter, in fact, every detail that goes to make a good advertising plate, label or tag. When considering this character of marking device, for advertising and identifying your product, get in touch with Matthews of Pittsburgh.

Attaching an etched name plate to advertise a refrigerator

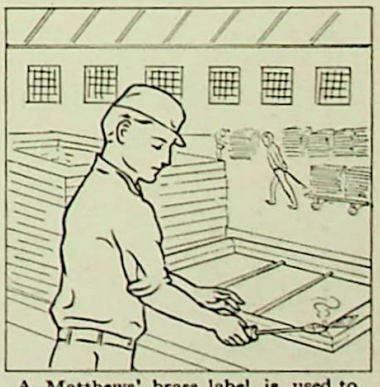


Using Matthews' brass number plates for numbering stock bins

A well-known brand of wire fence advertised by means of a tin tag

The wagons of a well-known manufacturer are trade-marked with a brass plate

Advertising and identifying a popular gas stove by attaching a brass label



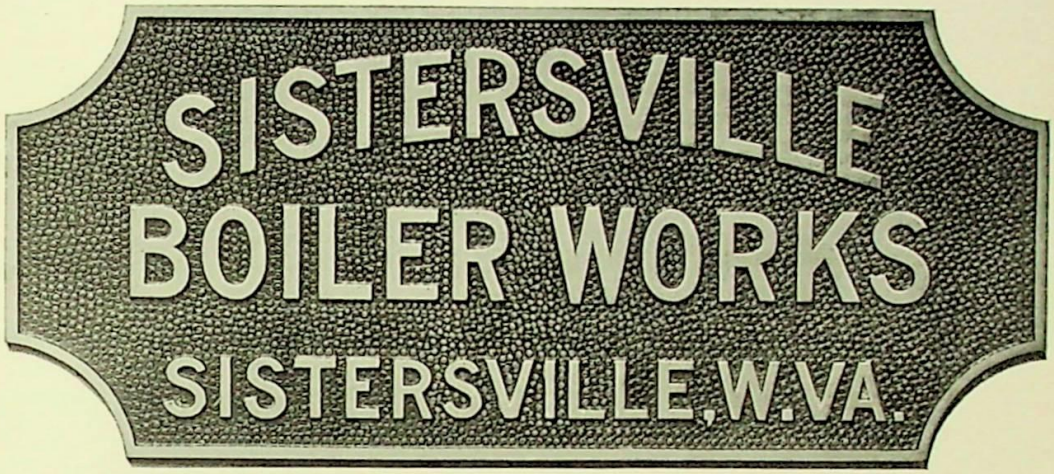
A Matthews' brass label is used to identify and advertise these skylights

GOOD STYLES IN CAST BRONZE NAME PLATES

Made With Raised Letters and Borders

Operating a complete, perfectly equipped sign department and making all kinds of bronze cast signs, gives us a knowledge and experience which greatly aids us in turning out good cast bronze name plates. We are prepared to furnish these plates in any style, size or shape you desire. Cast Bronze Name Plates are particularly desirable for attaching to machinery and products of a similar nature. Let us talk it over.

MATTHEWS' CAST BRONZE NAME PLATES



A MATTHEWS' CAST BRONZE NAME PLATE

attached to your product will properly represent you and produce the right impression on your customer. We make these plates from bronze metal with deep cut lettering and artistic designs. In making these plates, it is first necessary to engrave a pattern (which is charged to customer and becomes his property) from which moulds are made and name plates cast. Pattern shipped with plates or retained by us for future orders at the option of the customer.

THE MATTHEWS' ETCHED NAME PLATES

Etched names plates are universally used on all classes of products. They are distinctive, in fact, for service, style, looks and price, etched name plates are in a class distinctly their own.

Here is the name plate you have been looking for. Whether you want to use it on your machinery, automobiles, refrigerators, desks, vehicles, etc., you cannot get any better name plates for the purpose. Besides identifying your product at all times, they economically advertise your goods, and, from an advertising standpoint alone, you will not find a neater, more valuable advertising plate for your products than these etched names plates. We can furnish almost any size, design or quantity for any purpose. Let us know your wants now.

ADVERTISING AND IDENTIFYING "THE FORT PITT" BED SPRING

BY ATTACHING A MATTHEWS' EMBOSSED BRASS LABEL AND TAG

Here is another striking example of the way Matthews solves marking problems. The tags and labels are used to advertise and identify a bed spring. It tells the story of a good bed spring to the purchaser in a way that no unmarked spring can. It is of sales value to the manufacturer and to the dealer, both like to handle an advertised and identified product. Let Matthews suggest the proper, efficient method of advertising and identifying your product. We are here to render marking service and to assist in solving marking problems. Let us help make your product better known.

WE OPERATE OUR OWN FORGING DEPARTMENT

A corner of our Forging Department; the first operation in steel die and stamp making

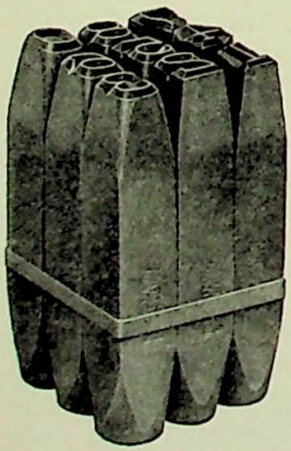
Operating our own Forging department enables us to make good on delivery promises

We can make you a steel lettering die or stamp that will mark your name, address, trade-mark or any identification mark you desire on your product—a die or stamp that will mark clear, distinct, easily read impressions, making the substitution of your product impossible. Write to-day to our steel die department for a copy of our interesting steel die book. It illustrates the different kinds of steel lettering dies and stamps which we are shipping to all parts of the United States.

MATTHEWS' BRASS BOOK PRINTING DIES

This is a photograph of one of our book printing dies made type high, for printing catalog or book covers, made of leather, heavy cardboard or paper. We make brass dies for printing rulers, yard sticks, cardboard boxes, burlap, heavy paper bags and many other similar products. These dies outlast and outprint the best electrotypes made, consequently they are much preferred, especially for long run printing. Get in touch with us for your brass die needs.

HAND MADE STEEL LETTERS and FIGURES



PYROMETER HEATED
SCLEROSCOPE TESTED

You'll like the "PITTSBURGH BEVEL" hand-made steel letters and figures because they're made to do better marking. These stamps are totally different from the ordinary kind. Get in touch with our steel die and stamp department.

Read the list on each wrapper.

This box advertising has helped the sale of a good soap

This firm does not overlook the advantages of using Matthews' Brass Printing Dies to advertise their product on their wooden boxes

MATTHEWS' RUBBER PRINTING PLATES

FOR PRINTING ADVERTISEMENTS ON CORRUGATED BOXES

THE "LUTZ AND SCHRAMM COMPANY" USE THEIR BOXES TO ADVERTISE AND PACK THEIR "FOOD PRODUCTS OF QUALITY"

This box advertisement was printed with the Matthews' Rubber Printing Plates. Our experience in the making of rubber printing plates used for printing advertisements on corrugated boxes, dates practically from the very beginning of the corrugated box industry. We are consequently in a position to furnish rubber printing plates that will bring out the advertisement in a very effective manner when reproduced on the corrugated box.

Packing boxes have always been considered a necessary expense yet shipping containers can easily be made to help pay for themselves by using the end and side spaces for advertising purposes.

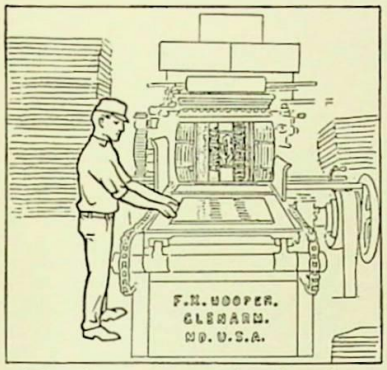
When a plain box is used, valuable advertising space on the ends and sides is being wasted, as unprinted or unadvertised boxes do not tell a story of the goods while in transit. A nicely printed corrugated box with a short, snappy *reason why* the particular product packed in the box should be used, is a valuable aid in selling and a splendid help in advertising a product.

A corrugated box printed with a Matthews' Rubber Printing Die makes a shipping and advertising container that will carry your advertising message wherever your box travels.

IF YOU USE CORRUGATED FIBRE OR WOODEN BOXES TO SHIP YOUR PRODUCT

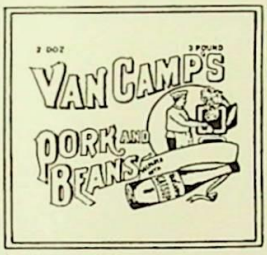
get in touch with our Printing Plate Department and let them suggest the design and reading matter for your box advertising. We are at your service.

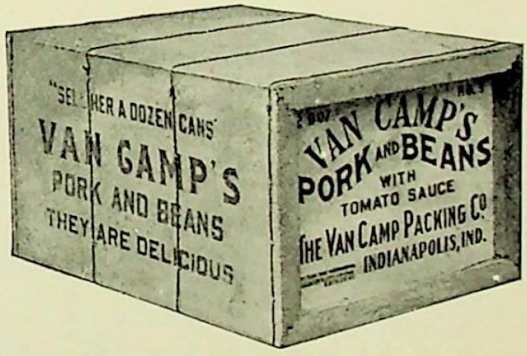
ADVERTISING BOX-PRINTING DIES



Advertisements are printed on boxes by using brass die and cylinder press

We make every variety and style of brass printing plate for printing advertisements on wooden packing boxes. Boxes should be used to advertise as well as to pack goods; they are traveling bill boards that give wide publicity. A number of well-known advertisers use MATTHEWS' printing dies to tell the story of their products on their packing boxes. We make a large number of the brass dies (used in this country) for printing advertisements on wooden packing boxes. Our orders come from box makers and box users who order the dies to be shipped to the box maker who makes and prints their boxes. "MAKING BOXES PAY FOR THEMSELVES" is the name of a little book we would like to send you. It tells and illustrates the value of box advertising for every box user.





Boxes used for advertising purposes instead of simply to pack goods

MATTHEWS' BOX-PRINTING OUTFIT

FOR ADVERTISING ON BOXES

Is used in connection with cylinder press by box makers and box users who operate their own packing box plant for printing changeable advertisements on wooden boxes. This printing outfit is now being successfully used by box manufacturers in the United States, England, Canada, Mexico, Norway, Spain, France, Germany and So. Africa. Get our book, "Making Boxes Pay For Themselves," for further interesting particulars.

One in. "	12.00

THE AUTOMATIC PACKING BOX NUMBERING MACHINE

A Labor Saver. Designed for numbering wooden boxes and packing cases consecutively. At each impression the number is advanced one unit automatically from "1" to its full numerical capacity. The figures may be re-set in a moment to commence at any number desired.

Elastic Type. The figures are cut in blocks of yielding fibre of great durability, which conforms to the ordinary uneven surface of a box. They are inserted in dove-tailed grooves in the wheels and may be easily removed and renewed if necessary, but they usually wear for years.

No Rubber. No rubber is used in this machine. An indelible oil ink (not affected by water) is supplied to the figures before each impression by an automatic attachment. Absolutely accurate numbering and sharp, clear impressions are assured.

One Thousand Cases a Day. A strong boy or porter can operate the machine readily and will number as many cases in one hour as can be done in a day with stencils or marking brush. Machines are furnished with four, five or six wheels with $\frac{5}{8}$-inch, $\frac{3}{4}$-inch or 1-inch figures.

This style of machine can also be furnished with sharp faced figures for sinking the characters into the wood. Prices on application

PRICE—BOUND IN LEATHER, HALF RUSSIA, $5.00

Descriptive Booklet Mailed on Request.

OUR SIGN DEPARTMENT

THE fact that we do a larger business in this line than any other firm in the U. S. is of interest to you, only so far as it emphasizes our facilities for service in this very important matter of a good sign.

Is it not true that to you, or to anyone else, the sign displayed by a manufacturer, merchant or a banker on his building, makes or mars the attractiveness and completeness of the front, more than any other one feature of the architecture or general design?

A good sign is like good printing—specifications count for something—but back of the specifications must be real skill and experience.

Our business has developed and grown largely by reason of the recommendation of our work to others, by satisfied customers.

MEMORIAL TABLETS

IN this department which is a large and important one of our business, we are specially well equipped to give complete service. It is a frequent occurrence for us to receive a preliminary inquiry for a tablet of this kind, stating "There has been some thought of providing a tablet, etc."

It is a pleasure to us to assist as far as is desired, or needed, in the shaping up of all the essential details, and if we are favored with the order, to provide perfect quality as to design and finish.

We specialize on high-grade tablets ranging in price from $50.00 to $200.00—but an effective, perfectly made tablet of simpler design and moderate size can be furnished at even less cost when the higher priced ones are not desired.

Some of the occasions for the use of these tablets are indicated on the next page.

Bronze Tablets are used for many different purposes, as the partial list given below will indicate

In Churches. As a memorial to loved ones who are no longer among the living.

To record gifts made in connection with the equipment of the church.

At the completion of new churches, to secure a permanent record of the building committee who have given their time and services.

As a memorial to beloved pastors—or officers of the church.

To record the history of the church organizations and previous societies.

In Hospitals. To record general gifts to the endowment funds.

To secure a record of the services of those who served on the board of trustees, or on the building committee at the time the hospital was built.

To place on the doors of wards, or rooms, the names of individuals or societies who have furnished such rooms.

In Public Buildings. To record the names of building committees and date of erection.

To record the gifts of equipments.

To record the history of a previous building or historic events which occurred on the site where the new public building now stands.

In Schools & Colleges. To commemorate the services of principals or teachers.

To secure an enduring record of members of graduating classes.

To record gifts and endowments.

In Historical Locations. To secure a permanent record of the deeds of valor of individual soldiers or of regiments.

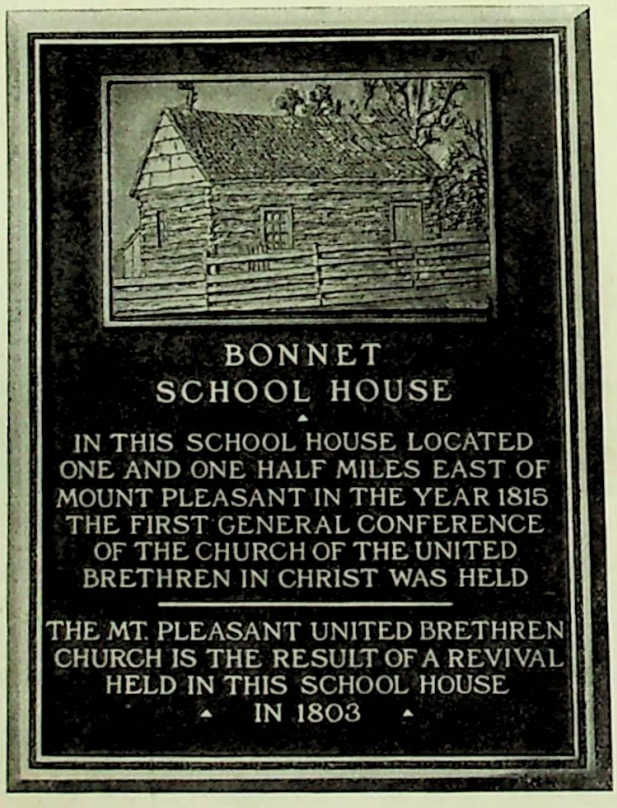
To commemorate important historical events, marking locations or buildings where such events occurred.

In Cemeteries. For use on monuments or on mausoleums where a record more permanent than marble or granite is desired.

Lodges or Societies. To commemorate gifts of equipment—services of members, also names of members who have passed away.

THE MATTHEWS' BRONZE MEMORIAL TABLETS

The Matthews' Bronze Memorial Tablets are masterpieces in bronze. They possess a natural richness of tone and quality which corresponds well with the memorial purpose for which they are designed. A Matthews' Memorial Tablet can be designed to order from rich art bronze for every memorial purpose. Write telling us the nature of the memorial desired and we will send you a finished sketch and give you our suggestions as to the proper bronze tablet to use, and the proper method of procedure in arranging memorial work.



BONNET
SCHOOL HOUSE
IN THIS SCHOOL HOUSE LOCATED ONE AND ONE HALF MILES EAST OF MOUNT PLEASANT IN THE YEAR 1815 THE FIRST GENERAL CONFERENCE OF THE CHURCH OF THE UNITED BRETHREN IN CHRIST WAS HELD
THE MT. PLEASANT UNITED BRETHREN CHURCH IS THE RESULT OF A REVIVAL HELD IN THIS SCHOOL HOUSE IN 1803

This is an actual photographic reproduction of a bronze memorial tablet designed by Matthews of Pittsburgh. Note carefully the harmonious correctness of every individual letter

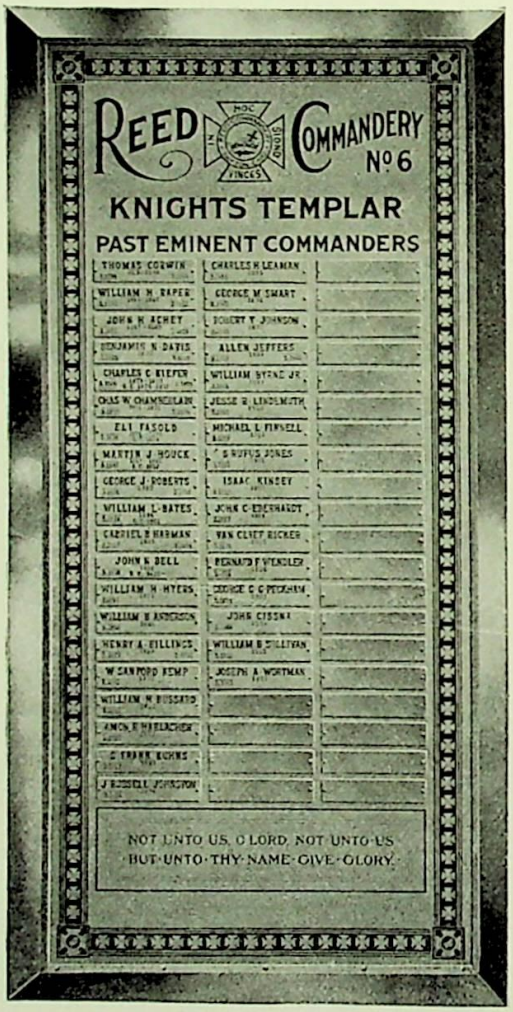
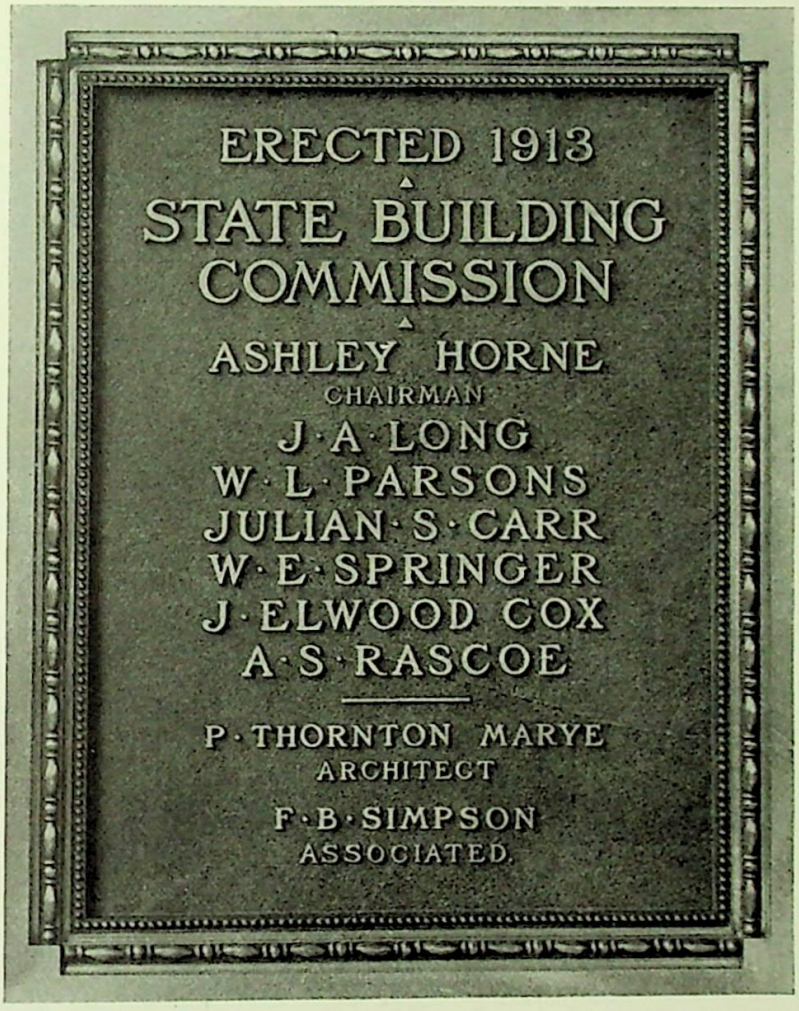
MATTHEWS' MEMORIAL TABLETS FOR LODGES

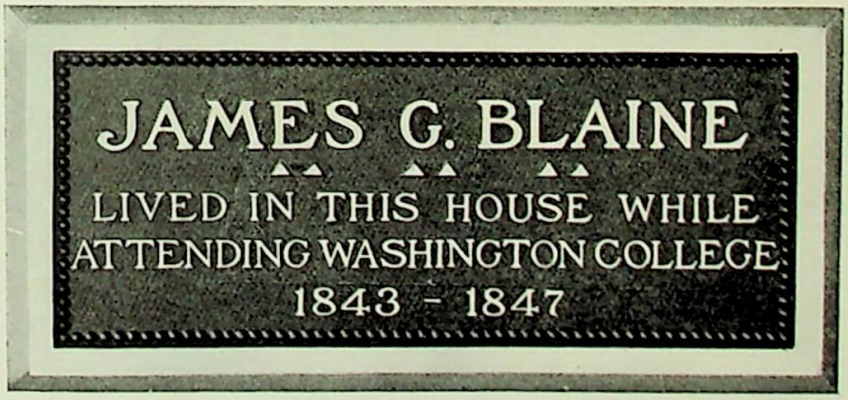


Memorial Tablet made by Matthews of Pittsburgh for the REED COMMANDERY No. 6, KNIGHTS TEMPLAR of Youngstown, Ohio. We furnish the official memorial tablets for B. P. O. E. and other well-known lodges and societies

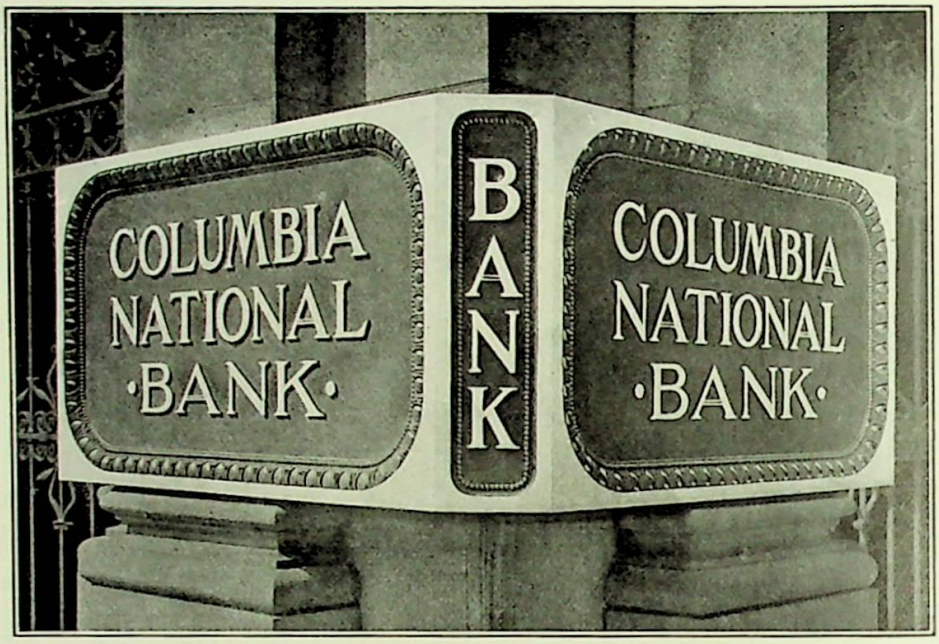
MEMORIAL TABLETS DESIGNED FOR PUBLIC BUILDINGS

The story of the erection of many public buildings and the historical fact in connection with same are fittingly and permanently told by means of a MATTHEWS' BRONZE MEMORIAL TABLET.





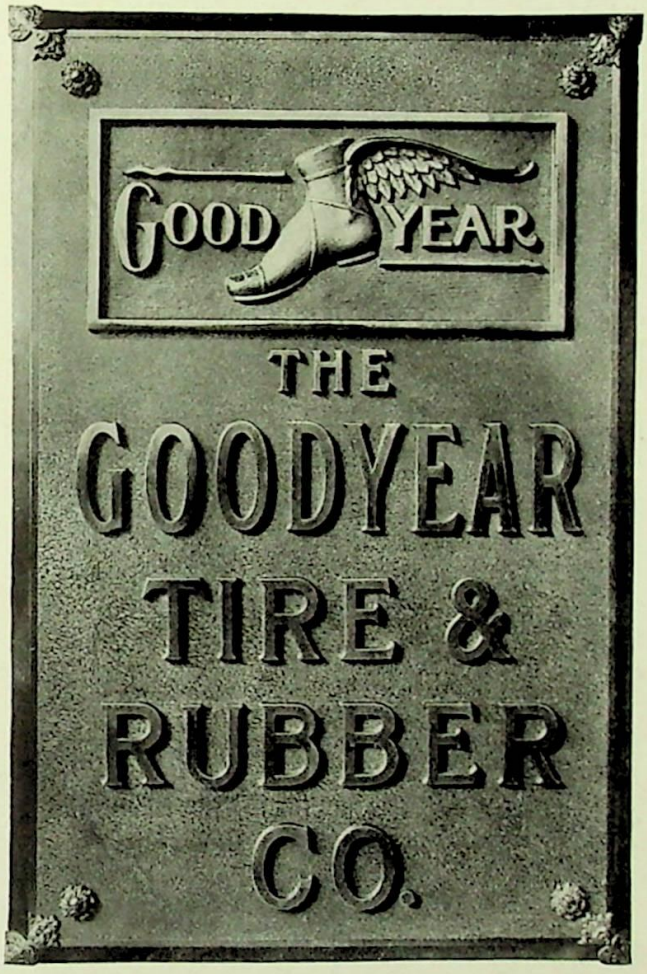
TWO EXAMPLES OF MATTHEWS' BRONZE TABLETS



An illustration of good bank advertising

Six of these rich, handsome bronze tablets readily identify the department store of Joseph Horne Co., as one of quality

A SIGN OF THIS CHARACTER IS A PERMANENT ADVERTISEMENT OF YOUR TRADE-MARK AND BUSINESS



Wouldn't a sign of this character, placed at the entrance of your factory building, make a "loyalty" impression on your employees at entrance and exit periods, and at the same time prove an advertisement of permanent value? Why not properly "SIGN" your factory building, the home of your product? Why not make the right impression on your employees, your customers, your townspeople, and yourself?

OUR BRONZE RAISED LETTER SIGNS

A good advertising sign brings a second floor location to the attention of ground floor buyers
It is sign publicity of the right kind

Banks throughout the country are using Matthews' signs
Every sign illustrated throughout these pages was manufactured in our complete sign factory

MATTHEWS' BRASS ETCHED SIGNS

In this department of our sign factory, we are producing the most perfect brass etched signs possible to manufacture. We have made a study of this particular type of sign and, as a result, can offer you brass etched signs of *first quality* at a reasonable price.

If you contemplate the purchase of a brass etched sign, write for a copy of our catalog, No. 101, which illustrates and prices a number of different classes of brass etched signs which we have made for banks and merchants throughout the country.

THE WILMINGTON SAVINGS AND TRUST COMPANY

WILMINGTON, N.C.

Gentlemen:

We recently completed our new banking home and had occasion to provide suitable signs to make the building complete. We placed our inquiry with a number of firms for sketches and quotations, and, as you know, finally gave you the order, doing so because you were apparently best equipped to give us complete service. The manner in which your suggestions provided for a durable and permanent construction without going to maximum or unnecessary expense was very pleasing to us. The outside signs, overhead bronze letters, and interior signs contracted for have arrived and are in position. We are more than pleased with them and the comments of our depositors are as favorable as our own. We know that they will give us, for years to come, very desirable publicity and if we had to take the matter up again today, knowing what we do now of your facilities, you would be given our order without question as to price, because you are specially competent to provide bank signs that are right in design and construction, at prices that are low, quality considered. You can certainly refer to us at any time.

Yours very truly,

C. E. TAYLOR, Jr., Pres.

A large number of letters received with remittances for signs contain comments similar to the above. A sign made by MATTHEWS usually means the best sign in town.

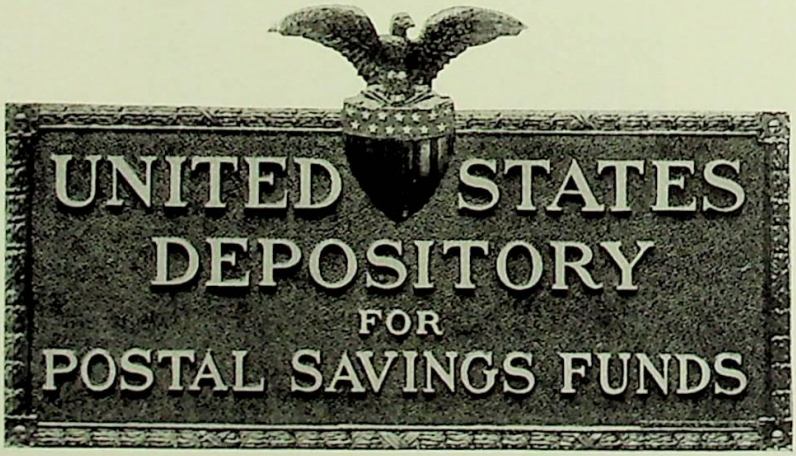
The Banking Institution of the Wilmington Savings and Trust Company is equipped with Matthews' Signs.

Read what this bank has to say about Matthews' signs.

BRONZE SIGNS OF QUALITY AND CHARACTER

These bronze professional signs are designed to be in proper keeping with the high standards maintained by the medical and legal professions. We make this class of signs in various styles and models, consequently it would be well to get in touch with us when in need of a professional sign and let us show you a selection.

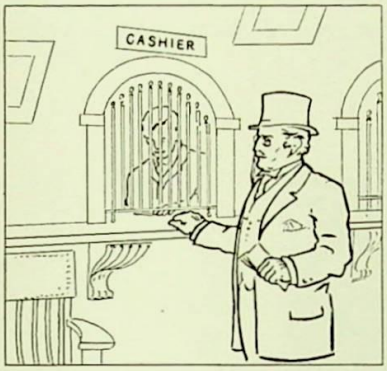
THIS BRONZE U. S. DEPOSITORY SIGN FOR POSTAL SAVINGS INVITES PATRONAGE FOR THE BANKS WHICH USE THEM



We manufacture many different types of signs of this nature for special purposes. Write us whenever you desire a specially designed tablet or sign.

A BRONZE OFFICE SIGN FOR ONE FIFTY

HERE ARE THE INTERIOR SIGNS YOU HAVE BEEN LOOKING FOR



These bronze interior signs are totally different from the old style stock enamel and brass etched plates, being strictly high-grade in every particular and made of solid bronze with raised letters and border. They look better and last longer than the enamel or brass etched signs and are a positive value for the money.

Very desirable for offices, showrooms, etc. or for use as desk, wall, door or counter signs. *Right now* in your office or showroom, you can use one of these bronze signs. It will prove attractive wherever placed and prove of value to customers in locating parties or places. Signs are 2x10 in size, are carefully designed and finished and are certainly a sterling example of the service and value of our signs.

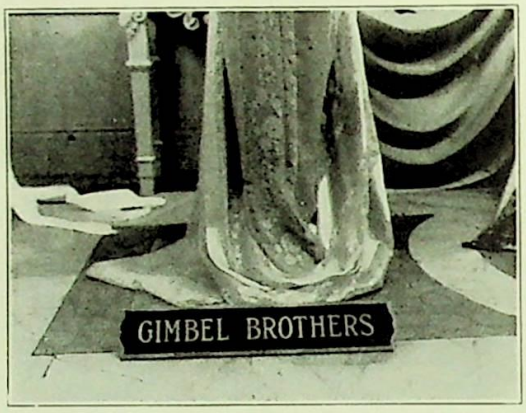
We are prepared to furnish the following stock plates at $1.50 each: OFFICE, PRIVATE, MEN, WOMEN, CASHIER, PARLOR, LADIES, CAFE, BAR. The same style of bronze signs, size, 12½x2, furnished at $1.75 each, with the following stock wording: NOTARY PUBLIC, LAVATORY, DINING ROOM and INFORMATION. The same style and size of bronze sign made to order with special wording, not exceeding 12½x2 inches, for $2.50 each.

A SPECIAL CATALOG OF THESE NAME PLATES

is now ready for mailing. It illustrates and prices a number of different name plates that will prove of value to use in any business institution. Ask us to mail a copy that you may learn how these plates can prove of value for your particular business. Do it right now.

A MATTHEWS' BRONZE WINDOW SIGN WILL ADVERTISE YOUR GOODS

You can make your window display distinctly your own and enhance the selling value of your merchandise by placing in your window one of these neat bronze signs made to suit your particular window.

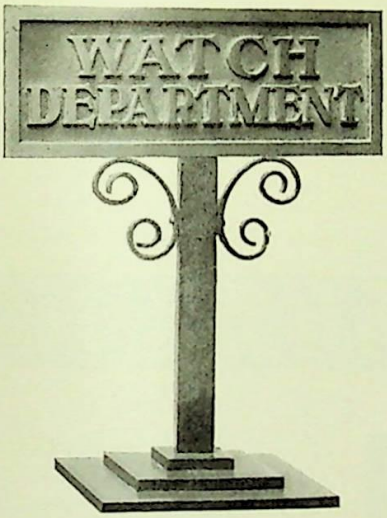


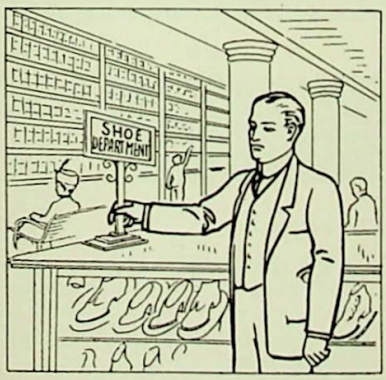
Matthews' window signs are made of solid bronze raised letters and border, or with special trade-mark lettering like the sign illustrated above. Signs require no polishing and when placed in position do not interfere with window display. Write our sign department, giving reading matter desired, and full particulars will be mailed to you promptly. Write for our Window Sign Booklet.

ONE OF THE MATTHEWS' FITTED SILL SIGNS
The stores of leading merchants in many different cities are advertised by means of a Matthews' Sill Sign

ATTRACTIVE SIGNS FOR THE DESK AND COUNTER

We make many different kinds of small desk signs for roll or flat top desks. These bronze signs are made with felt covered brackets to avoid marring the furniture, and are in keeping with the best grade of office fixtures. A desk sign of this character will prove of advantage to customers in locating their wants. These signs can be furnished with any reading matter desired such as "PRESIDENT," "H. G. LESLIE," "VICE - PRESIDENT," "ORDER DEPT.," "PURCHASING AGENT," "SALESMAN," though they are generally used with the individual name of desk owner. Send us your reading matter for your desk sign and we will promptly quote price by return mail.





Many retail merchants enhance the appearance and selling value of their interior display by using one of our unique, attractive bronze counter signs, similar to the one we illustrate. These signs can be made in keeping with the display and character of your business. A sign of this nature can also be placed on the desk though it is generally used as a counter sign. Prices promptly quoted for any sign of this nature which the needs of your business may call for.

SOLID BRONZE HOUSE NUMBERS AND LETTERS

Unless otherwise specified, all house numbers and letters listed below will be finished in polished bronze, with spurs placed on back for driving into the wood. Furnished with holes drilled through face for attaching by screws (screws furnished) 3 cents per character extra. We can also supply the styles listed below, finished in Antique Brass, Brush Brass, Green Verde, or Nickel-plated at 2 cents per character extra.

MATTHEWS' OLD 1856 PASTE POLISH

Price List

1 lb. can	$ .50
6 lb. can	2.50
5 lb. pails	2.00

Put up on "Easy to Use" Cans.

As manufacturers of high-grade metal signs, we know of nothing better than this "Old 1856" polish for giving a good shine to any kind of metal. It is particularly adapted for raised letter bronze signs though it will give a bright polish to any kind of metal, without any scratching.

MATTHEWS' LIQUID POLISH

Damascus Brand

Price List

Pint cans	$ .35
Quart cans	.70
Gallon cans	1.85

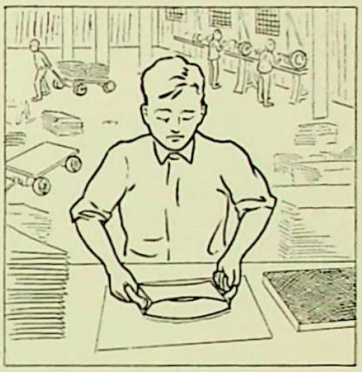
No user of metal signs should be without this liquid or paste polish

An excellent polish, intended particularly for use on etched signs, made either of brass, copper or bronze; also on brass railings, etc. This polish will not injure the baked enamel used in the signs, brightens the metal quickly, and produces a brilliant, lasting polish.

FOR MARKING GALVANIZED SHEET STEEL USE MATTHEWS' NEW PAT. RUBBER STAMPS

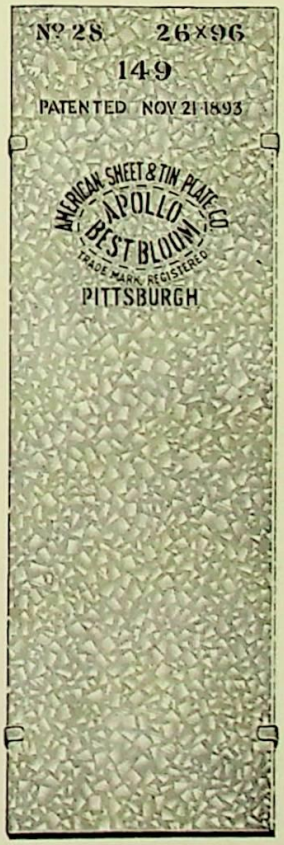
Give Quicker and Better Reproductions Than Stencils

These new patent rubber stamps, which are used by sheet mills for printing on their galvanized sheet metals, offer many advantages over the old method of marking with stencils. Being solid letters and designs, they are capable of giving better advertising reproductions as well as printing more quickly and making more impressions than stencils. They are made of a special grade of rubber and are vulcanized to give the best results when used with our special Printing Ink and Pads.



Marking good impressions with Matthews' new patented rubber stamps

Specimen reproduction of exceptionally fine advertising designs. Send us your requirements and we will quote price by return mail

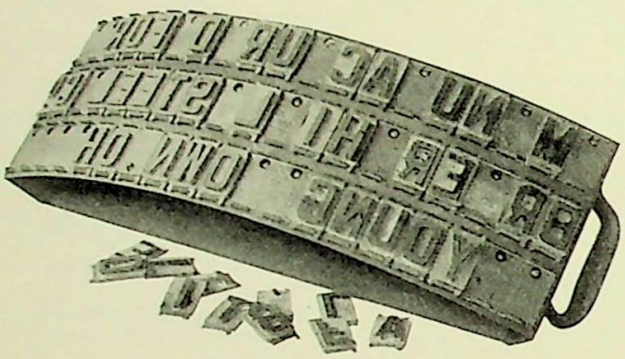


Well-known brand of galvanized sheet steel, showing trade-mark, gauge, size and weight stamped with the Matthews' new patented rubber stamps

51501

THE "JHM"
INTERCHANGEABLE GAUGE AND SIZE MARKER
WITH INTERCHANGEABLE FIGURES AND LETTERS FOR MARKING GALVANIZED SHEET STEEL

Patented October 15, 1913

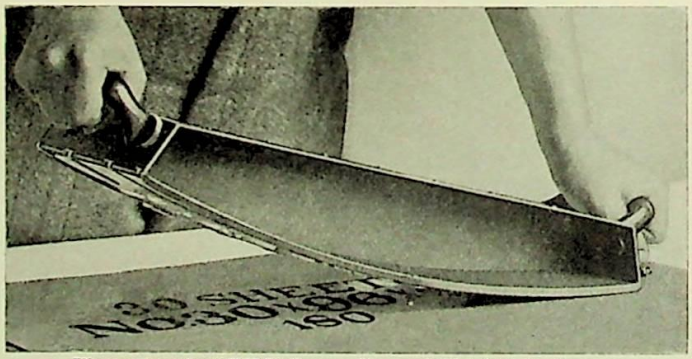


The "JHM" Interchangeable Marker

The Matthews' line of new patented rocker rubber stamps are made to mark galvanized sheet steel and various products made of this metal. They are substantially made to give long service, the mounts being made of steel, while the stamps are well cushioned to make good, clean impressions. Manufacturers of galvanized sheet steel or products made from this metal, who desire to use this advanced method of marking, are invited to write for some sample markings and further interesting information.

The "JHM" Interchangeable Marker is capable of rapid stampings of gauge size and weight on galvanized sheet steel. This outfit can also be used for marking changeable firm names, addresses, etc.

The "JHM" patented Marker consists of a steel mount curved to the correct radius, having a handle on each end as illustrated. On this mount is riveted the holders into which the changeable letters and figures are quickly fastened. The interchangeable letters and figures are made of rubber vulcanized on brass. When ready to use this equipment, the letters or figures are placed in the holders on the mount. To remove any letter or figure, simply push on the spring fastened to the mount under each individual character. Every letter or figure when placed in position remains rigid, and will not wobble or travel during stamping action, thereby assuring uniform, rapid markings. No experience is necessary to operate this outfit or to make the changes desired. The outfit is simplicity itself and is flexible to use for any interchangeable marking on galvanized sheet steel.



Illustrating the "JHM" Gauge, Size and Weight Numberer

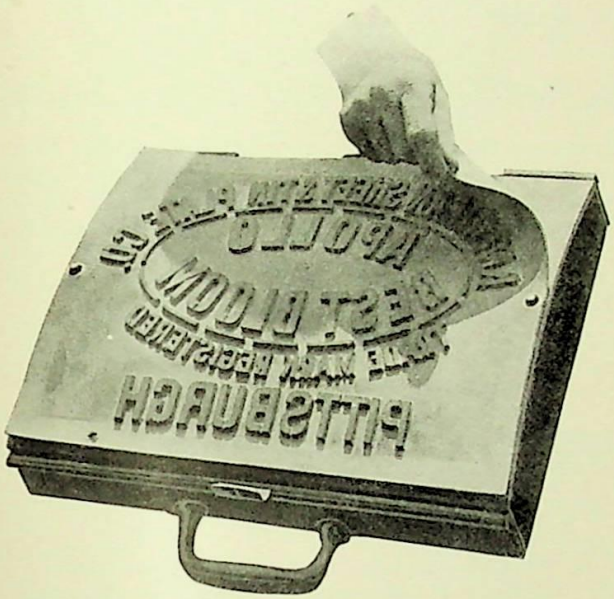
Further particulars of prices for equipment of this character for your individual requirements promptly quoted on request.

THE "MATTHEWS"

NEW ROCKER HOLDERS AND INTERCHANGEABLE RUBBER DIES

THE LATEST IMPROVED METHOD OF MARKING GALVANIZED STEEL SHEETS

Patented December 16, 1913



Illustrating the ease and quickness of attaching and removing rubber dies from the Rocker Holder

IT IS NO LONGER NECESSARY TO BUY COMPLETE INDIVIDUAL ROCKER STAMPS IF YOU HAVE A VARIED ASSORTMENT OF DESIGNS TO STAMP ON YOUR GALVANIZED SHEETS. The use of this Rocker Holder will enable you to quickly interchange (attach or remove) any number of individual rubber dies of the same size, saving the necessity and the cost of purchasing complete Rocker Stamps for each change in firm name, design or trade-mark.

Only one Rocker Holder is necessary, and when the workman wishes to shift from one rubber die to another he unsnaps the clamps, removes the die he has been using and immediately snaps another into place. The total operation takes but a few minutes.

The cost of each individual rubber die is very small compared to the cost of the old style complete rockers, so that a number of rubber dies and a single rocker represents a great saving in the original cost.

When the renewal expense is necessary it is a small item compared with the former methods.

The Matthews' patented Rocker Holder consists of a steel rocker mount strongly constructed and arranged for quick attaching of the interchangeable rubber dies for any design or trade-mark desired to stamp. As illustrated, the rubber dies are first placed over the guide pins, (see cut) then firmly fastened by the use of a solid frame. This frame is fastened down over the dies and clamped securely, thereby assuring uniform markings. The Matthews' Rocker Holders are curved to the correct radius for galvanized sheet marking, thereby preventing any "skidding" of the dies. This holder is considered the best on the market for interchangeable marking of galvanized sheet steel, and we guarantee it in every particular.

Prices promptly furnished on receipt of specifications as to the design to be used, size and the number of individual rubber dies desired.

MATTHEWS' METAL MARKING INKS AND PADS

The special "Vulcan" metal marking ink and special pads which we offer for use with our new rubber stamps assure a clean, neat metal stamping and will not injure the rubber stamps. For marking or stamping galvanized sheets, metal roofings, ceilings or other galvanized products we furnish either red or blue and recommend both colors as permanent and lasting.

SPECIAL PADS ARE FURNISHED FOR USE WITH THIS INK

This ink is used in connection with special ink pads which we make to order from best felt and white wood. These pads must not be confused with the pads used for regular rubber stamp marking as they are used only for this class of work. Further information, with prices and samples of this metal ink marking, will be gladly furnished on request.

Jas. H. Matthews & Co.,
Pittsburgh, Penna.

Gentlemen:

Ship us quick, by express, one quart of your special blue ink for stamping galvanized roofing. We want the same ink as was shipped us on your invoice of Jan. 18, 1912.

For your information we will state that the ink shipped us before has been very satisfactory, and would also state that the special stamps that you made up for us at that time have given good satisfaction.

Kindly rush the shipment of ink.

Yours very truly

NORTHFIELD IRON COMPANY

A copy of this interesting booklet will be gladly mailed on request. Write for your copy.

The Latest Improvement in Rubber Stamps

Matthews' Rubber Stamps Made With Mahogany Finished Mounts and Shapely Polished Handles

COST NO MORE THAN THE ORDINARY KIND

The real test of a good rubber stamp is in its action during working use, its legible impressions, and durability. Matthews' mahogany-mounted rubber stamps have been designed to stamp good, legible impressions and render lengthy service.

The construction and design of these stamps is the result of careful study on our part to meet the demands of the stamp user for a better, neat, serviceable rubber stamp and is in fit keeping with the improvements made in recent years in office equipment.

The shapely polished handles have been fashioned to fit the hand of the average stamp user so that wobbling will not occur during the stamping operation.

All stamps are printed with the original Matthews' label—a label placed on the stamp to indicate the wording—thus enabling the stamp user to instantly select the stamp to be used.

The Matthews' rubber stamps cost no more than the ordinary kind, yet they are entirely different in appearance and construction. Their use will be a pleasure to you, because of their neatness, durability and service.

MATTHEWS' MAHOGANY FINISH RUBBER STAMPS

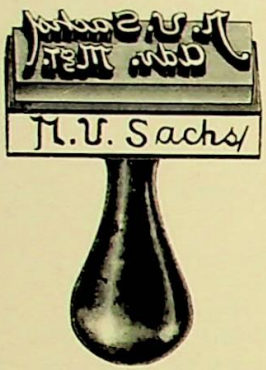
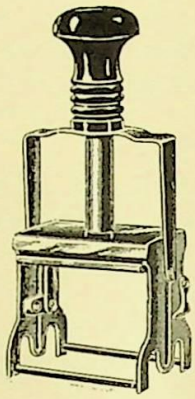
MATTHEWS' AUTOGRAPH STAMPS



Autograph Hand Stamp

EXACT FAC-SIMILE OF YOUR HANDWRITING REPRODUCED ON A STAMP

You may write the best sales-bringing letter and then hurt its selling effectiveness by exercising poor judgment in signing your letter. Get the best stamps and the best ideas in signature stamps. We have them both.



Autograph Self-Inker

DESCRIPTIVE PRICE LIST

Description	Style No.	Buck	Sponge	Knob	Self Inker
Autograph of initials	A	$1.25	$1.10	$1.00	$1.60
Autograph of name	B	1.50	1.25	1.00	1.85
Autograph of firm signature	C	1.50	1.25	1.10	2.75
Autograph of name and title	D	2.50	2.15	2.00	2.75
Autograph O. K. and initials	E	1.80	1.60	1.50	2.25
Combination autograph with name of firm and signature engraved	F	3.00	2.60	2.50	3.50
Autograph with one line of type	G	1.65	1.40	1.10	1.75
Autograph with two lines of type	H	1.80	1.55	1.20	2.25

While we also quote prices for these autograph designs on knob mounted stamps, the best results are obtained where they are either mounted on the Buck or Sponge cushion stamps. Buck cushion always sent unless otherwise ordered. We always ink self-inking stamps in black unless otherwise ordered as this color affords closest match to your pen and ink signature. In making Matthews' autograph stamps, your autograph is first cut extra deep on wood. From this wood-cut a stamp is reproduced, exact facsimile of your handwriting. One of these autograph stamps will enable you to dispense with the necessity of frequently writing your name in long hand.

MATTHEWS' AUTOGRAPH STAMP IN USE SINCE 1877

Here is a picture of a Matthews' Autograph stamp "born" in 1877 and still in use. We're as proud of it as its owner is. Give Matthews' stamps a square deal by using them properly and they'll repay your kindness by giving you good service for many years.

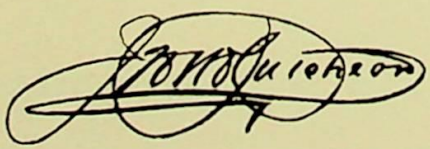
JAS. N. McCUTCHEON
EXPERT ACCOUNTANT
COLLECTIONS A SPECIALTY
1803 MACHESNEY BUILDING

PITTSBURGH, PA., Jan 6, 1914

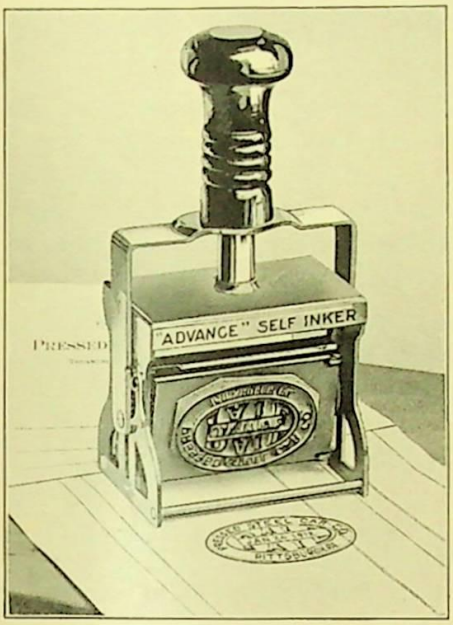
Jas. H. Matthews & Co.
Pittsburgh, Pa.
Gentlemen:

I herewith send you my autograph stamp as requested for your new catalogue and will give you the history in a few brief words. In the year 1877 I was engaged in the oil business and had use for many rubber stamps which I invariably purchased from you. About the latter part of the year, your agent called, and seeing my signature on some papers lying on my desk, remarked that it was an odd kind of a signature and requested me to write the same on the back of one of his own cards. Afterwards I received the stamp above referred to by mail and I think it would be very hard to procure a better one as I have used it constantly ever since that time. I trust the above information will be of use to you and remain,

Very truly yours,



ADVANCE NEW STYLE SELF INKING STAMPS WITH PNEUMATIC CUSHION DIES



Experienced stamp users like self inkers better than hand stamps because they are real time and trouble savers.

They are quicker because they ink themselves.

They are always inked ready for instant use. No separate ink pad delays.

They make neater and more uniform impressions than rubber hand stamps.

The date bands are of solid rubber, and during working use are firmly locked so that they cannot get out of alignment.

Patented pneumatic cushion on the die plate will not harden with age like the sponge cushion used on other self-inking machines.

New design frame with sides specially constructed to prevent wobbling during stamping action.

All machines are made of heavy steel, highly nickel plated.

The ink pad is detachable and constructed so the entire printing die is perfectly inked.

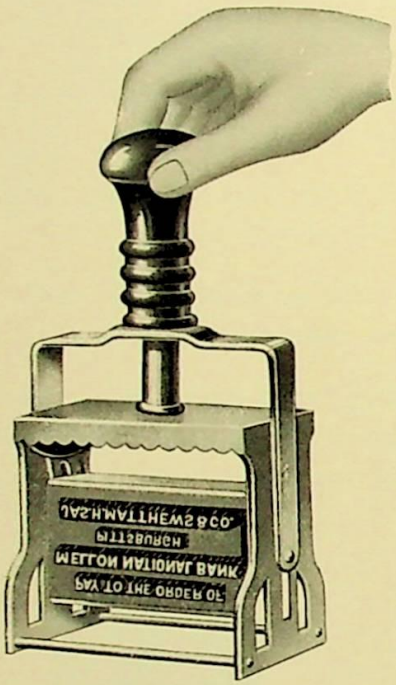
You now have the opportunity to get a self inker that will stand the wear and give you complete satisfaction.

It's a pleasure to use the New Advance Self Inkers

THE ADVANCE SELF INKING STAMPS

Plain Self Inker Made Without Dates

Most of the sample impressions illustrated in this catalog, in fact, most any reading matter you desire on a stamp, can be mounted on the plain self-inkers in the sizes listed below. Rapid, legible stamping in one operation makes this style self-inker a more economical purchase than ordinary hand stamps. That's why experienced stamp users are giving them the preference over hand stamps, especially in the sizes 11 to 14.



There are 10 different sizes. Pick the size that best suits your stamping requirements.

No. 11	Prints $\frac{1}{2}$x1$\frac{3}{8}$ Inches	$	.60
No. 11$\frac{1}{2}$	Prints $\frac{5}{8}$x1$\frac{3}{4}$ Inches		.70
No. 12	Prints $\frac{3}{4}$x2 Inches		.75
No. 13	Prints $\frac{7}{8}$x2$\frac{1}{2}$ Inches		.85
No. 13$\frac{1}{2}$	Prints 1 x3 Inches		1.25
No. 14	Prints 1$\frac{1}{8}$x2$\frac{1}{4}$ Inches		1.00
No. 15	Prints 1$\frac{1}{2}$x2$\frac{1}{4}$ Inches		1.50
No. 16	Prints 1$\frac{1}{2}$x2$\frac{1}{2}$ Inches		1.75
No. 18	Prints 1 x4 Inches		1.75
No. 19	Prints 2 x2 Inches		2.00

You will frequently find when ready to order a small rubber stamp that you can place the reading matter or lettering you want on any of the sizes of plain self-inkers listed above. This will enable you to frequently use one of these self-inkers in place of a rubber hand stamp at only a slight additional cost.

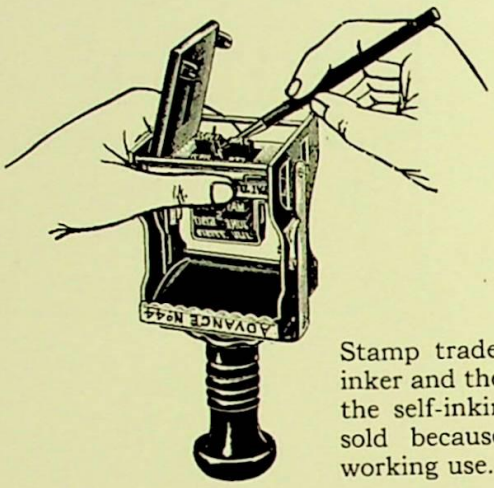
A GOOD SELECTION IN A TYPE BAND DATER



Made in Four Sizes, $2.75 to $3.75

Many stamp users prefer this because they like a self-inker with type band dates. These type band dates are good for ten years, made of solid rubber type vulcanized to endless bands and are easily and quickly changed, as illustrated.

No. 44 Prints $1\frac{1}{8}$x$2\frac{1}{8}$ Inches or less . . $2.75
No. 45 Prints $1\frac{1}{2}$x$2\frac{1}{4}$ Inches or less . . 3.25
No. 46 Prints $1\frac{1}{2}$x$2\frac{1}{2}$ Inches or less . . 3.50
No. 49 Prints 2x2 Inches or less . . 3.75

Stamp trade sales prove conclusively that this self-inker and the one we illustrate on opposite page are the self-inking dating stamps most widely used and sold because they render the best service during working use.

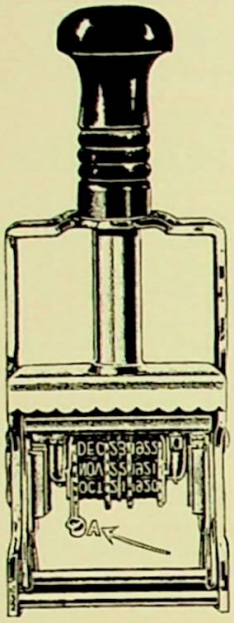
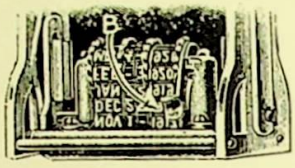
BUREAU OF AUDITED VOUCHERS



THE ADVANCE SELF INKING BAND DATER

With the New Improved Lock



Here is the New Improved Lock that Means Accurate Dating. "B" Shows Position of Lock when Locked

"A" Shows Position of Lock when Unlocked

Made with band dates spring tensioned on endless bands and easily turned to position by a turn of the thumb wheel. Attention is called to patent lock which holds the date bands firmly in place and positively prevents their slipping or traveling during stamping, thereby insuring neat, straight-line dating impressions. Like the type band dater illustrated on other page this self-inker is up among the leaders in stamp trade sales because it has been tried and not found wanting. Made in these four sizes at the following prices.

No. 34 Prints $1\frac{1}{8}$x$2\frac{1}{4}$ inches or less..$2.00
No. 35 Prints $1\frac{1}{2}$x$2\frac{1}{4}$ inches or less.. 2.35
No. 36 Prints $1\frac{1}{2}$x$2\frac{1}{2}$ inches or less.. $2.50
No. 39 Prints 2x2 inches or less.. 3.00

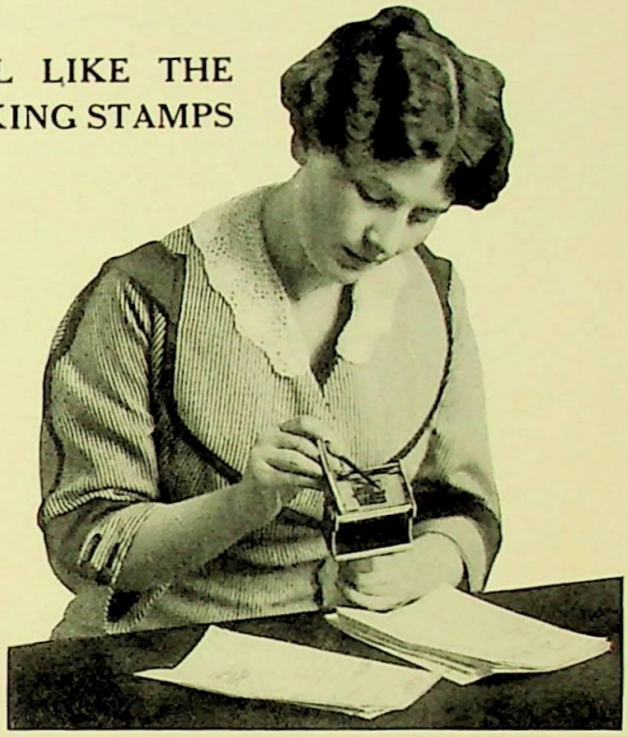
EVERY USER WILL LIKE THE ADVANCE SELF-INKING STAMPS

On the desk of a busy man, the advantage of using an Advance Self-Inking Stamp instead of a hand stamp and pad—one article instead of two—is so obvious as to render comment unnecessary.



The Advance Self-Inking Type Band Daters are much favored because the dates are easily and rapidly changed

Office employees like to use Advance Self Inkers, for they are always in good order and ready for immediate use

The Advance Self-inking Stamps bear the same relation to the ordinary hand stamps that fountain pens do to the ordinary dip pen. You'll never go back to hand stamps once you try an Advance Self-Inker.

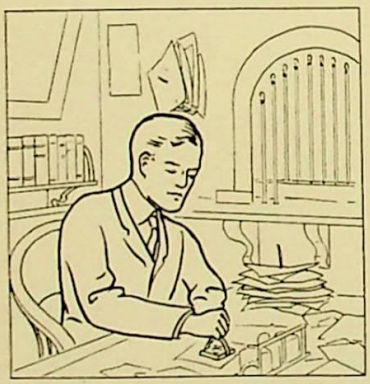
A FEW WORDS ABOUT TIME STAMPS

Time stamps are used to register time of incoming and outgoing mail, recording time on jobs, time of employees, and other purposes where time is an important factor. We carry a complete line of time stamps and can furnish them with any wording, such as Received, Mailed, Shipped, Recorded, Filed, Entered, Answered, or any other reading matter to suit specific needs.

Stamping the time the daily mail is received at office

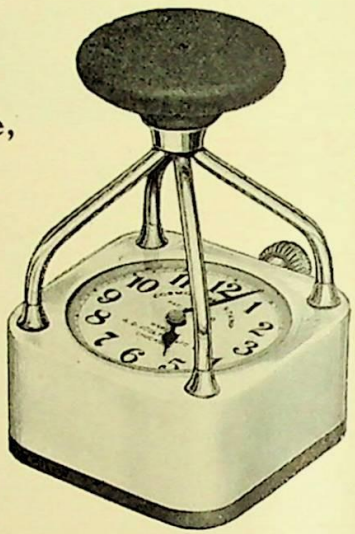


Stamping the time of starting and completing orders

Stamping the time of the employees' entrance and exit

THE COSMO TIME STAMP

Price, $7



The Correct Timer

Here is a mechanical clock time stamp that is meeting with much favor. The watch runs regularly, consequently stamp registers correct time to the hour and minute. Can be used with firm name for marking Rec'd, Answered, Forwarded, Shipped, etc., or for any inter-office and factory time marking.

The Cosmo Time Stamp enables one to affix the date, hour and minute of any business transaction or event. The paper upon which this stamp is impressed may serve as future legal proof, prevent controversies and prove of inestimable value.

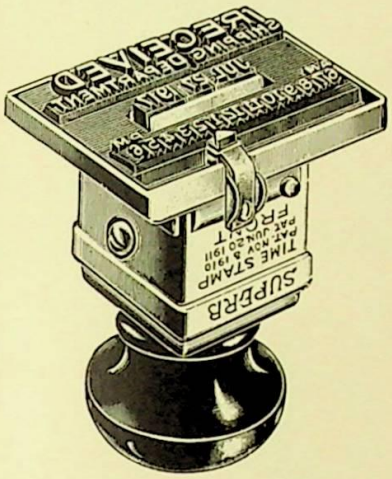
TWO GOOD RELIABLE TIME STAMPS

THE NEW SUPERB TIME STAMP, $3.00

Endless Type Band Dates and Pneumatic Cushion Die Plate



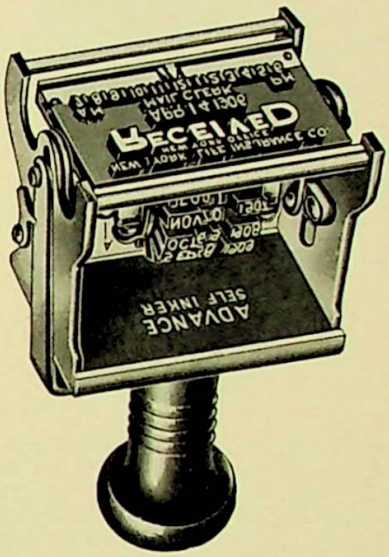
Here's why the "Superb" is a favorite with experienced time stampers. The specific time wanted can be placed either at the top or bottom. Time indicator is held firmly in place at position set and will not travel during stamping action assuring impressions that can be relied upon.

No.	Size of Plate	Position of Time
2	1½x2½	Bottom
4	2 x2	Top

Price, either style.....$3.00

"ADVANCE" SELF-INKING TIME STAMP. PRICE, $5.00

Endless Type Band Dates



The question of time being an important one careful selection should be made in a time stamp. Here is the only worth while, low priced, self-inking time stamp on the market. It is fitted with pointer which slides along die plate, and points to hour wanted. As the time dial on the "Advance" Time Stamp is in the same position as the No. 2 "Superb" any of the impressions shown with time at bottom can be mounted on either style of time stamp.

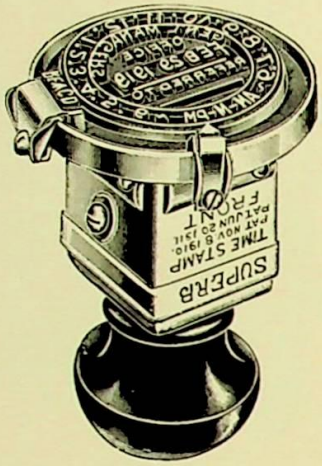
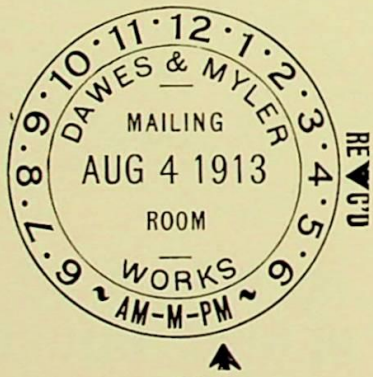
FOLKS WHO LIKE A TIME STAMP THAT MARKS A ROUND IMPRESSION SHOULD INVESTIGATE THESE TWO GOOD MODELS

The "Superb Rounder" Price, $3.00



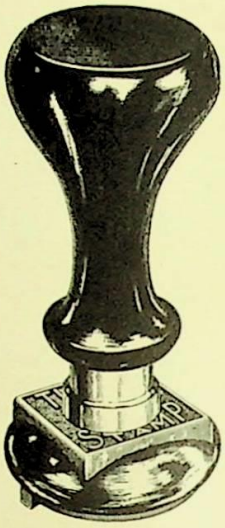
The "Superb Rounder" is a time stamp made with type dates vulcanized on an endless rubber band. To change the date, press the button on frame, raise the die plate and turn date bands with pencil. You'll like this time stamp and the way it works.

712



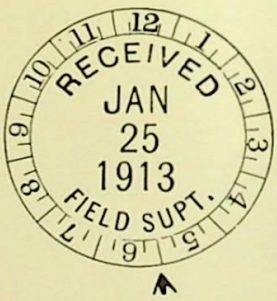
714

The Air Cushion. Price, $1.75

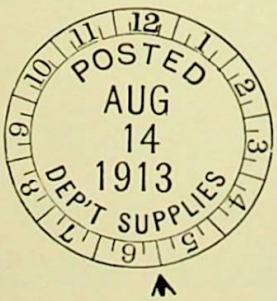


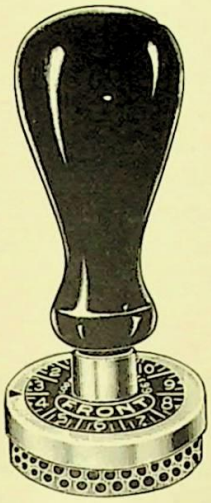
The Air Cushion is a good Time Stamp made with Aluminum base, flexible handle and insertable Type Dates. Indicator in the rim of the stamp turns the dial to any time desired. Furnished with any reading matter inside the dial in round shape and complete with dates for $1.75.

716



718





COOKE'S PATENT TIME STAMPS

If you want a neat, round impression for your time marking, send us your order for the Cook time stamp. As noted on illustration the rotary dial revolves around the inner circle, in this way bringing the time desired directly above the indicator. As this indicator is a part of the stamp itself, this gives you a durable time marker hard to get out of order. This stamp MARKS QUARTER HOURS and can be furnished with any reading matter desired such as SHIPPED, MAILED, ANSWERED, RECORDED, RECEIVED, CANCELED, FILED, APPROVED and so forth.

HERE ARE THE SIZES AND PRICES

Number	Shape	Sizes	Price
1	ROUND	1½ in. diameter	$2.00
2	ROUND	1¾ in. diameter	2.50
3	OBLONG	1¼x2 in. diameter	3.00

Prices include complete set of days, months and six-year dates. Below are actual size impressions of the three different sizes.

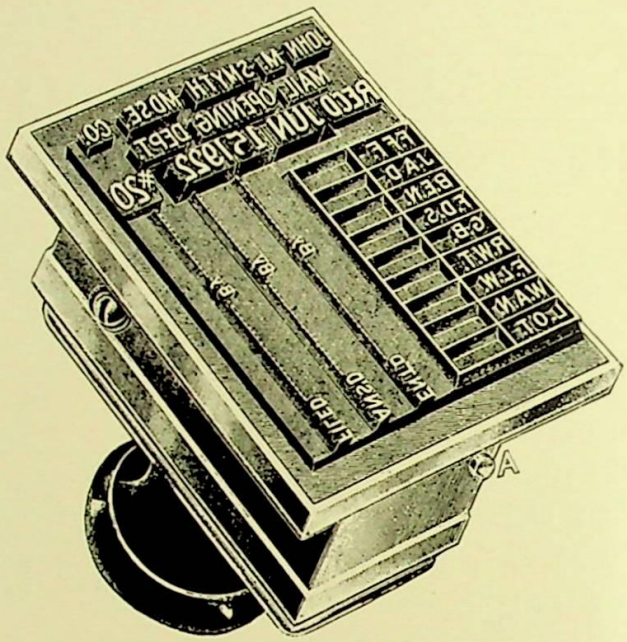
SOMETHING NEW IN SUPERB DATING STAMPS

Attention is called to the new dating arrangement found only in this style of hand band dater



A new member of the Superb family specially designed to meet the requirements of firms who desire to use large forms (similar to specimens) in conjunction with a revolving date. This has not been possible heretofore owing to limitations in the size of the daters. Dates can be arranged in three ways—at the top, at bottom or a combination style with the dates at both top and bottom.

No.	Printing size	Position of dates	Price
20	1⅞ x 2½	At the top	$3.00
21	1⅞ x 2½	At the bottom	3.00
22	1⅞ x 2½	Top and bottom	3.50

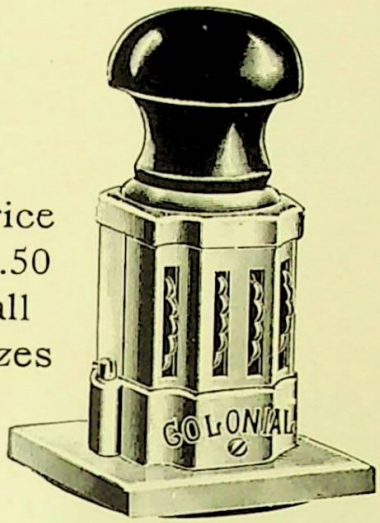
THE COLONIAL BAND DATING STAMP



Price $1.50 all sizes

The "Colonial" has a natural desire to do only good, clean stamping and give long service because it was "born" for this class of work. Dates are arranged on THREE BANDS instead of four, as in the old style daters. Bands are easily changed for dates without any soiling of the fingers.

Date bands are good for six years and are made with a new patented adjustment that prevents the dates from getting out of alignment, which means good stamping impressions all through working use. Die Plate is made with pneumatic cushion, double checking and minimizing the possibilities of stamping poor impressions.

No.	Printing Size
0	$1\frac{3}{8}$x$1\frac{1}{4}$ Inches
1	$1\frac{1}{4}$x$1\frac{3}{4}$ Inches
2	$1\frac{1}{2}$x2 Inches

THE NEW MAJESTIC HAND BAND DATER

The new "Majestic" is all you can ask for in a good, serviceable, hand band dater, made to sell at a low price. Made with the pneumatic cushion die plate that adds so much to the life and service of a stamp of this nature. The dates, good for six years, always print in the centre of the impression, while to change the date is a very simple operation. When you can buy a good dating stamp like this for so low a price it offers you an opportunity to economically equip your office for every dating stamp need. Any ordinary lettering within limit of sizes shown below can be used on these stamps.

THE NEW JAHMACO DATING STAMP

Price, $1.25 with Rigid Handle

These new style daters are totally different from the ordinary kind, being made with a metal base instead of wood as has been customary, and further equipped with pneumatic cushion. Type dates are made for close insertion and will not drop out of the date slot during the process of stamping. The JAHMACO comes in two styles as per illustrations—with long flexible handle and short rigid handle. These dating stamps will accommodate most any lettering that you wish to stamp in connection with the date.

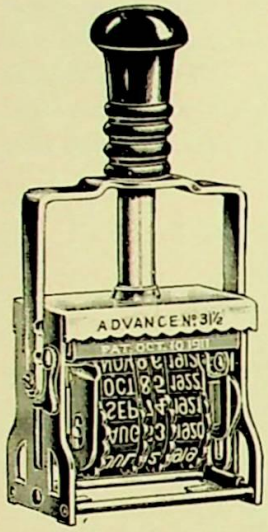
THE BEST IN SINGLE LINE DATING STAMPS

Self Inker Style



Date bands are made for ten years and are uniform in thickness being made endless by a new patented process. Owing to construction of the bands, date bands will not slip during stamping and are always in alignment. Furnished in sizes and styles illustrated below. The lock on these self-inkers holds the date bands firmly in place and prevents travelling or slipping during stamping.

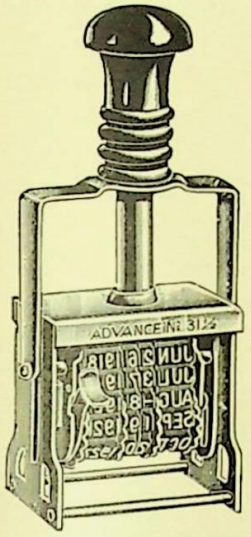
THE HANDY DATING STAMPS—12 STAMPS IN ONE

Made in Two Styles

Advance Self Inker Style
Price, $1.50



A page of handy dating stamps for nearly every use. The prefix and affix dater is especially desirable being made with five bands containing years, months and days for dating and the last band containing handy words constantly used—thus making it a practical office stamp capable of being used for twelve specific purposes. Can be furnished with fourth word band before or after date as per specimen impressions.

THE NEW MODEL 63 DATING MACHINE

A good, low-priced self-inking dating machine that will eliminate the troubles you have heretofore experienced with daters. The all-steel construction and beautiful finish makes it an ornament as well as an article of utility. Dates are changed by hand with a wooden stylus and can be moved forward and backward as desired. The date impression only occupies a space of $\frac{3}{4}$ of an inch. The year wheel is abbreviated as per specimen impression.

Price,.....$2.50 Each

MODEL 53 DATING MACHINE

Where heavy use necessitates a stamp of much stronger construction than our self-inking line, we recommend this particular model as being one that will give entire satisfaction. The machine is made of the best steel and constructed in a manner to insure durability, also ease in operation. Date wheels are advanced to the requisite date by pressing the lever that appears on the front of the machine. The list below shows the various combinations that is possible to obtain with engraved interchangeable stock dies on this machine, for $10.00. Should the regular dating machine at $10 which includes stock forms, not prove suitable, special engraved dies can be furnished for 20c a letter extra.

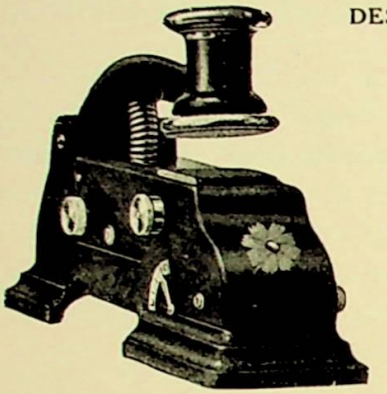
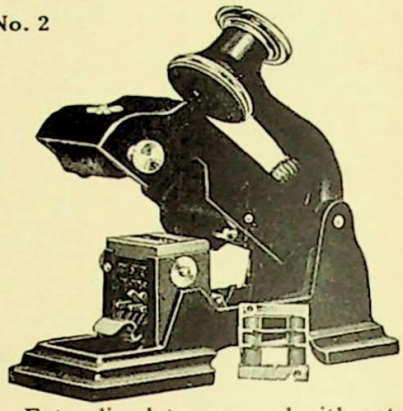
THE COSMO DATER

DESCRIBING MODEL No. 2



Price, with plain engraved die plate, $8.00



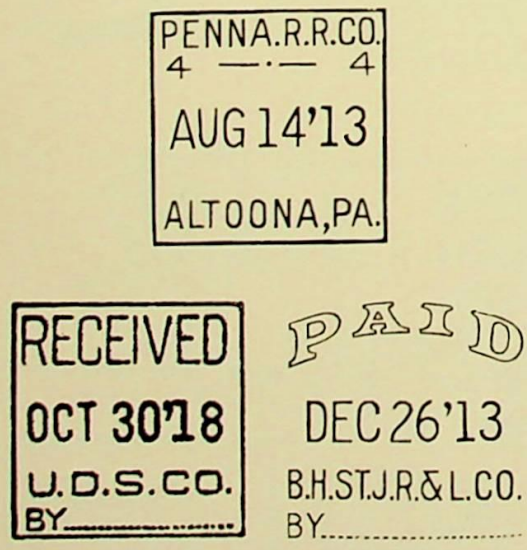
Extra die plate engraved with not over 20 letters, Price, $2.00

The COSMO is a *five-wheel perpetual dater.* The engraved date wheels of solid brass are mounted with solid bearings on a revolving steel shaft, thus eliminating lost motion and resulting in perfect, legible date impressions.

The die-plate is made of special bronze, reinforced by two braces, (see cut) which absolutely prevent die-plate from sagging in the center, or from being placed in position ǝpıs-dn down.

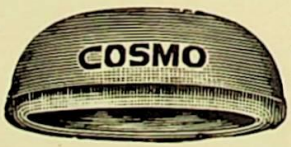
The date wheels are locked by the positive means of individual lever keys—one for each wheel—and by the same means released for change of date, this being accomplished by a short turn of the shaft, which carries the released or unlocked wheel to the required position, preventing wheel slippage and the resulting mis-dating of tickets.

While the "Cosmo" is designed principally for use in railroad ticket offices, many firms have appreciated its advantages as a serviceable dater where a goodly number of daily impressions are to be stamped. Furnished with impressions as shown below.



Size and Style of Impressions

HAND PROTECTOR



Fits the handle top of any brass wheel or similar dating stamp.
Price, 30c

COSMO STAMP MAT

The "Rubber Feet" or base cushions save that jar in stamping, improve the printing quality of the brass wheel dater, and when used on desks, etc., prevent them from being marred or scratched up.

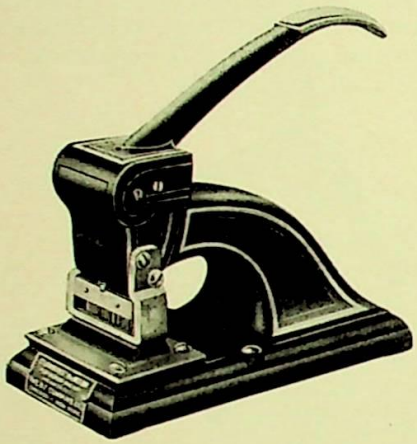
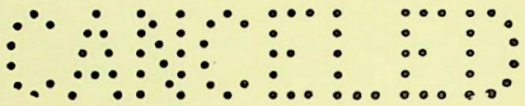
THE CUMMINS No. 15 CANCELING MACHINE

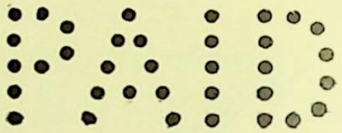
Price, $18.00

Perforates "PAID" or "CANCELED" size as illustrated. Weight, net, 18 pounds; boxed, 22 pounds; height, 10½ inches; base, 11x5 inches; length of handle, 11 inches. Finished in black enamel and also in nickel.





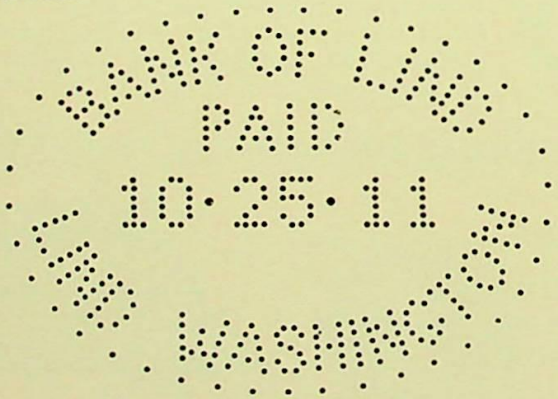
SAMPLE IMPRESSIONS



CUMMINS No. 6 DATING CANCELER

Price, $50.00

This is the only perforating canceler made with changeable dates that may contain the full name and address of the user. On account of the great number of perforations necessary, the opening in this machine is limited to a maximum of three sheets of paper of average thickness. The construction insures great durability and lasting wear in the dies and punches—in fact, this machine is quite as durable as a canceler using much larger perforations and punching a greater number of sheets.

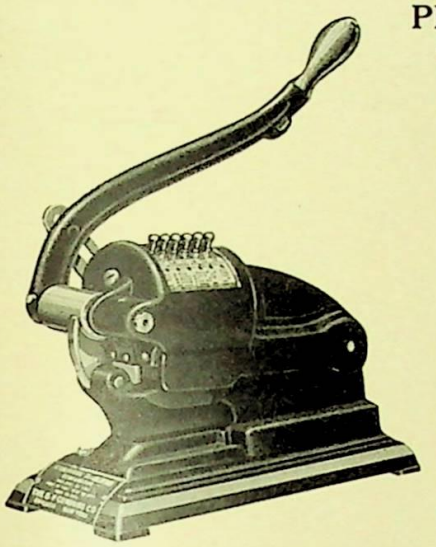


SAMPLE IMPRESSION

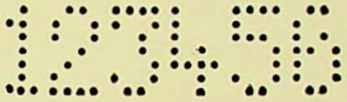
We can supply you with any of the renowned CUMMINS' PERFORATING MACHINES to meet your requirements. These machines have earned a nation-wide reputation and are in use throughout the world for a variety of purposes for which they are practically indispensable. There's a CUMMINS' MACHINE for nearly every perforating or canceling purpose. Let us know your wants in this direction. We stand back of every Cummins' machine we ship.

CUMMINS No. 11 CONSECUTIVE NUMBERING PERFORATOR

(NON-AUTOMATIC)



STOCK DIE



10 Sheets at each stroke

SPECIFICATIONS:—Weight, net, 15 lbs. Boxed, 20 lbs. Height, 7 inches. Base, 9½ x 4½ inches. Length of handle, 11½ inches. Finished in black enamel and nickel.

Price, $40.00

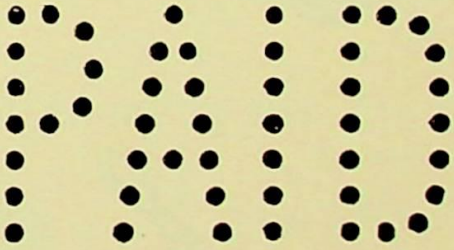
No. 11 is a favorite machine with insurance companies for the numbering of policies and receipts, and with manufacturers for marking shop orders and time cards. It is also used for marking membership cards, receipts, tickets, passes, etc. The change from one number to another is made in a moment. The capacity of the machine with perforations, as shown, is 10 sheets of paper per stroke, or their equivalent in cardboard.

THE CUMMINS No. 4 CANCELER

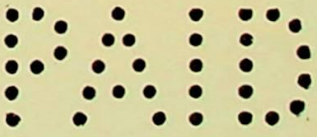
Price, $40.00

SPECIFICATIONS

Weight, net, 48 lbs. Boxed, 62 lbs. Height, 8½ inches. Base, 15x8 inches. Length of handle, 20 inches. Finished in black enamel and nickel.



No. 3 CANCELER



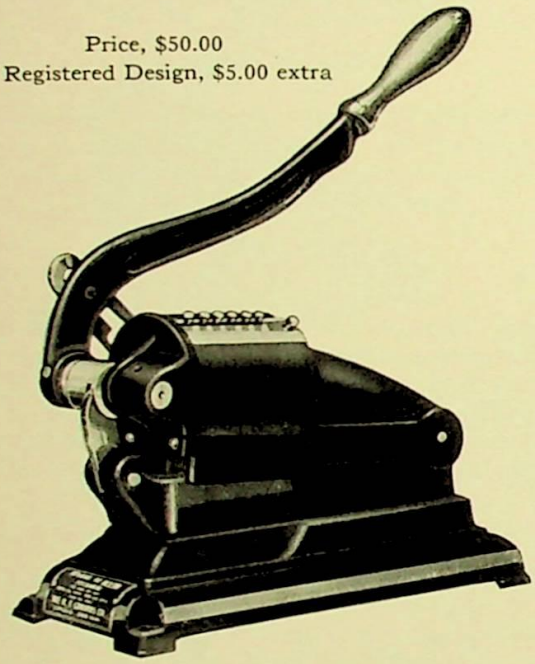
Price, $25.00

This canceler has been on the market for more than twenty years. Owing to its large capacity (30 sheets of average thickness at each stroke) it is a very suitable machine for canceling coupons, premiums, etc., when the word "PAID" is a sufficient cancelation.

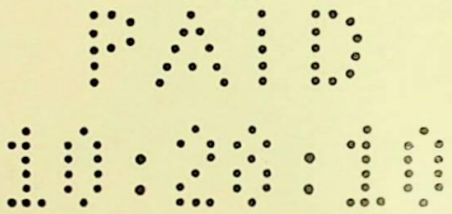
THE CUMMINS No. 12 DATING CANCELER

A canceler of medium size which perforates the word "PAID" and the date (see illustration) through 10 checks at each stroke. This is an ideal canceler for banks, business houses, public officials, etc., having not more than 600 to 700 items a day to cancel. The machine has a capacity of 10 checks per stroke and is built to give many years of hard service.

Price, $50.00
Registered Design, $5.00 extra



Stock Die



SPECIFICATIONS

Weight, net, 26 pounds; boxed, 34 pounds; height, 8½ inches; base, 12x5 inches; length of handles, 15½ inches. Finished in black enamel and also in nickel.

THE CUMMINS No. 2 DATING CANCELER

Price, $40.00

This No. 2 dating canceler is slightly smaller than the No. 12 model, otherwise it is the same in construction. Perforates the word "PAID" and the date (see illustration) through five checks at each stroke.

SPECIFICATIONS

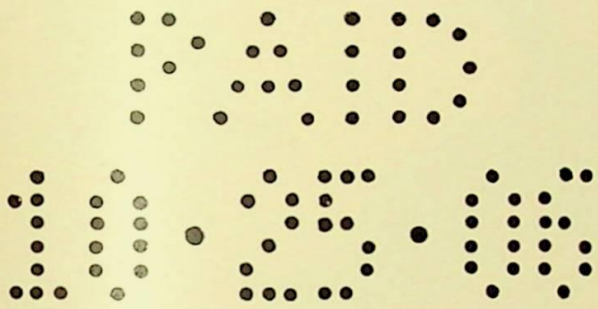
Weight, net, 15 pounds; boxed, 20 pounds; height, 7 inches; base, 9½ x 4½ inches; length of handles, 11½ inches. Finished in both black enamel and nickel.

THE CUMMINS No. 24 DATING CANCELER

The largest, fastest and most durable hand-operated dating canceler. It is designed for hard work and lots of it, and is especially adapted to the cancelation of checks, notes, drafts, vouchers, invoices, etc., in large banks and business houses. The No. 24 model has a capacity of 20 to 25 checks per stroke and a working speed of 200 to 300 per minute.

Two complete sets of the cutting parts are furnished with each machine, which means:—Uninterrupted Service, Double Lifetime, Minimum Expense for Sharpening and Repairs.

Stock Die

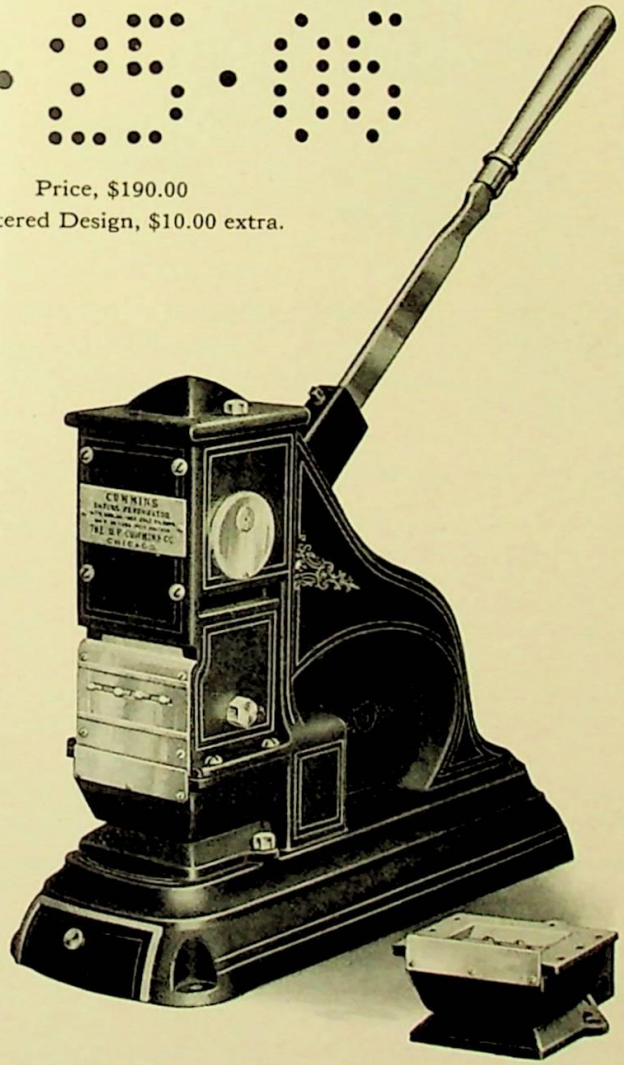


Price, $190.00

Registered Design, $10.00 extra.

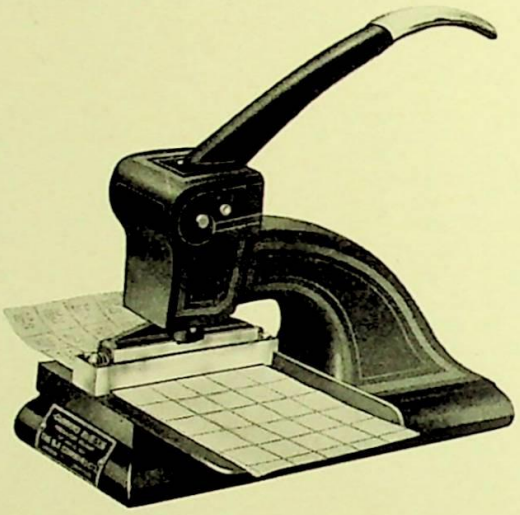
SPECIFICATIONS

Weight, net, 165 pounds; boxed, 200 pounds; height, 14½ inches, base, 20½x8½ inches; length of handle, 22½ inches; finished in black enamel and nickel.



CUMMINS POSTAGE STAMP PROTECTORS No. 52

Under the Postmaster General's ruling, dated May 4, 1908, it is lawful to *perforate* U. S. Postage Stamps with letters, numerals or other marks or devices for identification purposes. This has been found the only effective method of preventing the stealing of stamps.



The stamps are perforated in half sheets lengthwise. They lie flat on a plate flush with the die and are pushed forward by the operator one row at a time. A marginal guide properly locates the perforation on each stamp.

PRICES AND CAPACITIES

3 or less initials on each of the 5 sections of stamps, (20 stamps each stroke. Row of 5, four sheets thick) $32.50

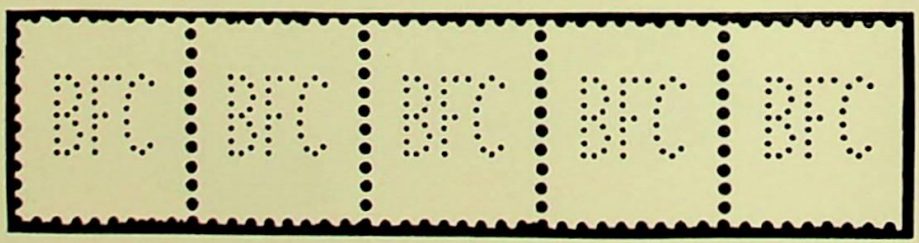
4 initials on each of the 5 sections of stamps, (15 stamps each stroke. Row of 5, three sheets thick) 36.25

5 initials on each of the 5 sections of stamps, (10 stamps each stroke. Row of 5, two sheets thick) 40.00

6 initials on each of the 5 sections of stamps, (10 stamps each stroke. Row of 5, two sheets thick) 43.75

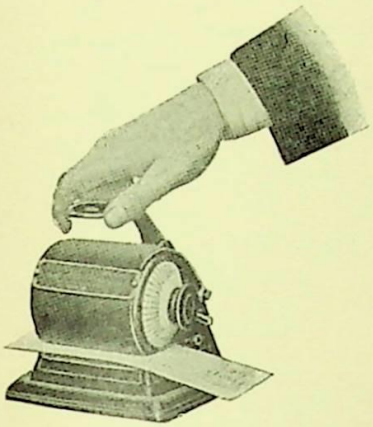
SPECIFICATIONS:—Weight, net, 23 lbs. Boxed, 28 lbs. Base, 5x11 inches. Height, 10½ inches. Length of handle, 11 inches. Finished in black enamel and nickel.

The perforations made by these Machines conform to the requirements of the Post Office Department, i. e., Holes not over 1-32 in. in Diameter. Total space not over ½-inch square.



HERE ARE THREE CHECK PROTECTORS THAT REALLY PROTECT YOUR MONEY

THE PROTECTOGRAPH. PRICE, $30.00

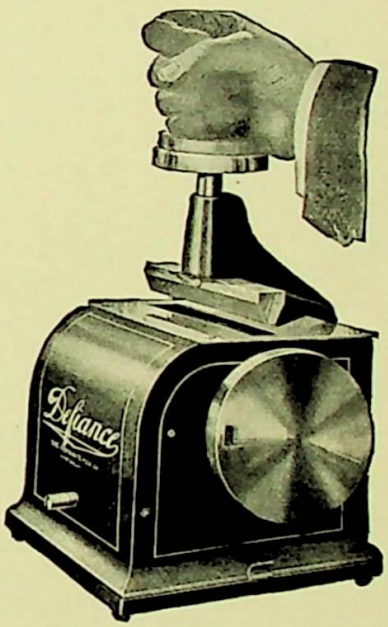


With one movement of the lever a line like this

NOT OVER THIRTY DOLLARS 30

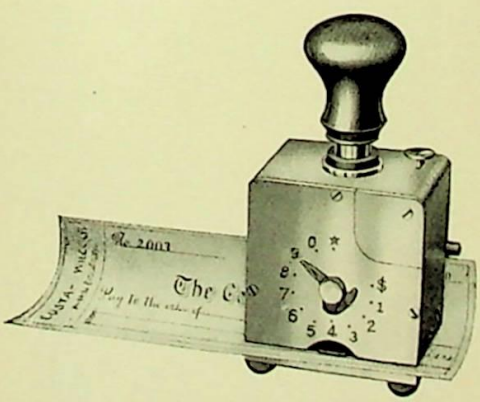
is stamped upon any part of the check. The letters and figures are cut into innumerable little slits and a specially prepared indelible ink is forced into the very fibre of the paper, making it a part of the document itself and rendering successful alteration impossible. **Advertised the world over.**

DEFIANCE CHECK PROTECTORS PRICE, $15.00



This is a model that will protect your money. It stamps across the face of the check a slotted type indelible ink impression and at the same time breaks the fibre of the check paper thereby preventing tampering. A good value for the money and a protector we can recommend. Marks an impression like illustration below.

NOT OVER FIFTEEN DOLLARS $15★



WILL YOU INVEST $10 TO PROTECT YOUR CHECKS

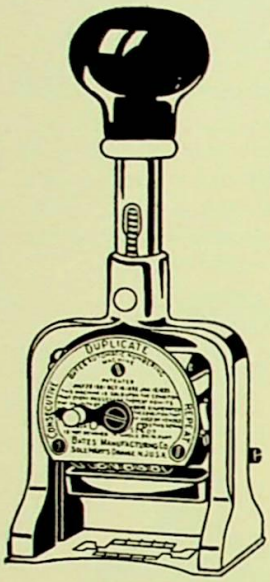
The "New Era" is the only low priced guaranteed machine that will give you the protection you need. It cuts and macerates the paper of your check, driving indelible ink through and through the fibres. This is the only recognized principle of perfect check protection. The imprint looks like this

$10★

It cannot be altered or removed without destroying the value of the check.

The New Era is a marvel of ingenuity, workmanship and efficiency. It is strongly guaranteed and built to withstand years of service. It is ideal in every respect and has a host of thoroughly satisfied users.

BATES' AUTOMATIC NUMBERING MACHINE



When you tell your purchasing agent to get you a good hand numbering machine the old reliable Bates is one he'll feel like ordering after comparative tests. The descriptive price list tells the story of what it can accomplish, and year in and year out use will fully prove the good things all users say about it.

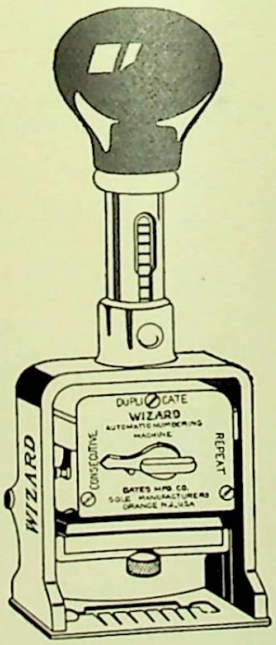
2. Quadruplicate, Consecutive and Repeat.
3. Quintuplicate, Consecutive and Repeat.
4. Sextuplicate, Consecutive and Repeat.

WIZARD—THE NEW HIGH-GRADE AUTOMATIC HAND NUMBERING MACHINE

Another member of the well-known Bates family of numbering machines, furnished in the same styles of type as the Bates, shown above, and also equipped with dial-setting device. Like all of Thomas A. Edison's products, it is mechanically perfect and is quite the best value on the market in numbering machines at the price. All wearing parts and figures are made of specially hardened steel. The mechanism is enclosed as in the Bates, thereby minimizing trouble caused by dust and grit.



4-wheels, numbers from 1 to 9,999	$9.00

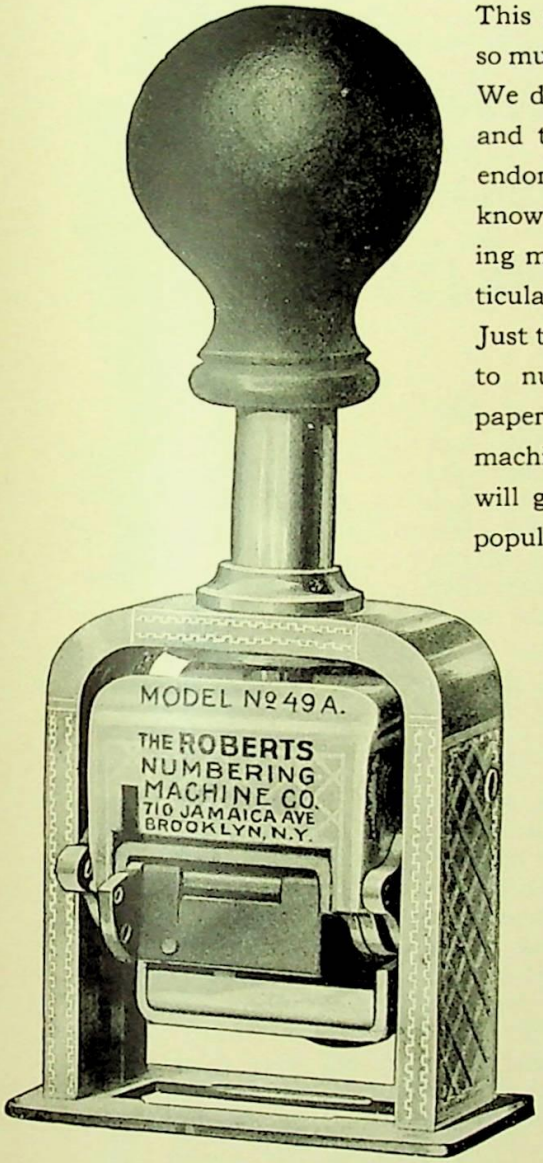
ADVERTISED THE COUNTRY OVER

PRICE
$5.00



This is the numbering machine you have read so much about in the leading business magazines. We devote an entire page to properly illustrate and tell the story of this machine because we endorse and guarantee it and want you to know its good qualities. Here is a numbering machine, carefully constructed in every particular, that cannot be equalled at the price. Just the kind of a stamp you have always wanted to number orders, checks, drafts and other papers. We show a life size illustration of this machine in order to show you exactly what you will get when you send us your order for this popular numbering machine. To have a Model 49-A on your desk means that you have a good, serviceable numbering machine ready for practically every numbering purpose. You will make no mistake if you specify Model 49-A as the numberer to order for your numbering machine requirements.

These machines are made to number consecutive, duplicate and repeat. The following special movements can be furnished at an additional cost of $1.00.

No. 1 Triplicate, consecutive and repeat
No. 2 Quadruplicate, consecutive and repeat

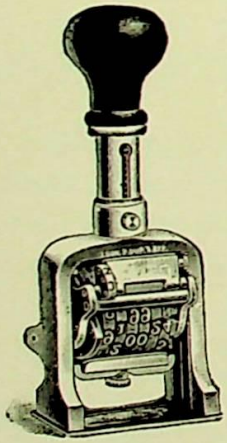
THE COLUMBIA AUTOMATIC NUMBERING MACHINE

Made with Large Size Figures as Illustrated



Style

5248

The "Columbia" is an accurate, reliable numbering machine with an automatic movement. Made with a new style and size of figures specially desirable for numbering time cards, checks, orders, etc. The "Columbia" is made with steel wheels, cast bronze frame, while the figures are engraved on steel. The machine works rapidly without friction, numbering CONSECUTIVE, DUPLICATING and REPEATING. Purchasers will secure a machine that will always stamp a clean, legible impression and one that will give durable and efficient service. Investigate the "Columbia" when in the market for numbering machines with large size figures.

RUBBER STAMPS THAT SAVE TIME AND MONEY

ON THE following pages we show impressions of rubber stamps that save time and money. These impressions cover stamps used in all departments of any well organized business institution and they are accurate impressions taken from stamps made by us for various firms. Each impression shows a time and money saving application and we leave it to your judgment to select the particular style of stamp you desire to mount these impressions on.

Each impression, therefore, (shown on the following pages) has been given a letter, either A-B-C-D-E-F or G. The letter after the number indicates the particular style of stamp the impression can be mounted on as indicated below and as illustrated on the next two pages.

After Selecting The Impression That Suits Your Needs, Information Below and Illustrations On The Opposite Page Will Tell You What Particular Style of Stamp The Impression Could Be Mounted On.

IMPRESSIONS LETTERED A

Impressions lettered A can be mounted on any of the four styles of hand stamps shown on following page marked (Division A).

IMPRESSIONS LETTERED B

Impressions lettered B can be mounted on any of the five styles of stamps shown on following page marked (Division B).

IMPRESSIONS LETTERED C

Impressions lettered C can be mounted on either of the two styles of stamps shown on page 185 marked (Division C).

IMPRESSIONS LETTERED D

Impressions lettered D can be mounted on either of the two styles of stamps shown on page 185 marked (Division D).

IMPRESSIONS LETTERED E

Impressions lettered E can be mounted on any of the three styles of stamps shown on page 185 marked (Division E).

IMPRESSIONS LETTERED F

Impressions lettered F can be mounted on any of the five styles of stamps shown on page 185 marked (Division F).

IMPRESSIONS LETTERED G

Impressions lettered G (principally used as time stamps), can be mounted on either of the two styles of stamps shown on page 153 of this catalog.

Here are the different styles of Division "A" & "B" stamps that the impressions shown on following pages can be mounted on. Select the style and price stamp that best suits your needs

DIVISION "A" & "B" STAMPS

Division "A" are the Knob, Moulding, Sponge and Buck hand stamps illustrated. Division "B" are the same as Division "A" with plain self-inker added.

LABOR-SAVING SPECIFICATION STAMPS

The engineering division of the power sales department of the Narragansett Electric Lighting Company, Providence, Rhode Island, is obliged to make numerous detailed drawings of electrically driven machinery installations in connection with its studies of power situations.

They use in connection with this work three rubber stamps, which represent the outlines of motors. This is a great time and labor saver as compared with drawing the motor outlines with a draughting pen. Greater uniformity in addition to time saving is thus obtained. The same plan may be applicable to other frequently recurring drawing plans of machinery, etc. as suggested in illustrations below. Send us your blue prints or drawings and we will promptly quote prices for rubber stamps of this character.

SHIPPING DEPARTMENT BILL OF LADING STAMPS

Interstate Commerce Commission Rulings Necessitate the Use of Such Stamps by Almost Every Shipper

8022 A

This is to certify that this shipment of liquified petroleum gas has been properly weathered and is placed in shipping containers that comply with the Specifications of Interstate Commerce Commission, approved June 2nd, 1911, and that the vapor pressure on this liquid at a temperature of 100° F., is ..... pounds per square inch

8023 A

The value of the shipment covered by this contract is fixed by the shipper at .....cents per pound which is accepted by the carrier as the real and true value thereof and the rate of freight is charged in accordance therewith, and the carrier assumes liability only to the extent of such valuation and no further. **SMITH & HORTON**
WARREN, PA.

By .....

8024 A

The Fibre Boxes used for this shipment conform to the specifications set forth in the box makers certificate thereon, and all other requirements of Rule 2-B of the Official Classification; Complies with Rule 42 of the Western Classification; Complies with Rule 9-A of the Southern Classification.

8025 A

This is to certify that the articles in this shipment are properly described, packed and marked and that all necessary labels have been attached to packages as required by paragraphs 1801 to 1857, inclusive, of the Regulations for the Tranportation of Inflammable Articles and Acids.

8026 A

Weights are shown on this bill of lading by the shipper for the convenience of carrier, and can be verified at any time by an examination of the records on file in the shipper's office.

8027 A

This is to certify that the above articles are properly described by name and are packed and marked and are in proper condition for transportation according to the regulations prescribed by the Interstate Commerce Commission.

COLLECTION STAMPS

They tell their own story and get results

8200 B

SMALL ACCOUNTS

If not watched, accumulate rapidly, and often there is considerable delay in obtaining settlement—their very insignificance causes them to be overlooked—which means loss of time, extra postage, etc.

We, therefore, ask you to please give this bill prompt attention, and remit—please don't put it aside.

8201 B

Please pay this small item in Postage Stamps, unless convenient to send N. Y. or Chicago Draft, Express or P. O. Money Order. Your local check costs 10 cts. to collect.

8202 B

Several demands have been made for payment of this account. By settling at once you will save us the trouble and yourself the expense and embarasment of having this account placed in the hands of our attorney for collection.

8203 B

As a matter of convenience to you we sent these goods without asking pay in advance. Unless paid promptly postage absorbs what ever profit there is in the sale. Kindly remit without further delay.

8204 B

Draft for $..... will be made the.....inst. unless we hear from you in the meantime that it will not be entirely convenient and satisfactory.

Yours Truly,

A. F. DAUM CO.

8205 B

This account represents balances that extend beyond our very reasonable terms of credit. A check to bring the matter into better shape would be very acceptable.

8206 B

PAST DUE!

☞ This account has no doubt escaped your notice. Will you please favor us with a remittance at your earliest convenience.

8207 A

Our customary monthly examination of our ledger shows your account to be balanced.

Allow us to express our appreciation of the business with which you have favored us, and to solicit a continuation of your valued patronage.

We call your attention especially to our very complete line of Victrolas, Victor Records and Player Piano Rolls.

Very respectfully,

C. C. MELLOR CO.

8208 B

The nature of our business is such that we necessarily have a great many accounts widely scattered, and which aggregate a very large sum.

If you will make it a point to remit the amount of above statement at once, you will confer a great favor on us.

8209 B

While we take pleasure in accommodating our patrons to the extent of our ability, we depend on the prompt payment of accounts due us for the settlement of our own bills. We, therefore, solicit your early attention to the above account past due.

THE BEST TYPE FACES
FOR MAKING RUBBER STAMPS

Our rubber stamp department is equipped with almost all of the latest type faces suitable for making good rubber stamps. For those who like to select their own style of type for their rubber stamp requirements, we have prepared OUR SPECIAL CATALOG "K," a book that illustrates all of the type faces which we use in manufacturing all classes of rubber stamps and rubber dies.

Most of our customers, however, find that better results can be obtained by telling us for what purpose the rubber stamps are to be used and the space which they are to occupy. Many of our customers, however, let our expert typographers, who make rubber stamps year in and year out, exercise their own judgment in selecting and arranging the type to be used.

C. P. Hathcoke, President B. Livingston, Vice President J. A. Leggett, Cashier

The People's Bank,

Waynesboro, Miss.

Messrs. Jas. H. Matthews & Co.,
Pittsburgh, Penna.

Gentlemen:

I have your letter of the 27th inst. and replying thereto beg to state that my order from this point was by no means my first experience with your house as I have given you my orders for the past six or seven years—first, as cashier of The Bank of Rowlesburg, West Virginia, and for the past four years as Cashier of the First National Bank of Pennsboro, West Virginia, and regardless of the fact that I am now a much greater distance from Pittsburgh, I find that I receive the same prompt and satisfactory service that I did when within two hundred miles of your city. The order for fifty stamps which I gave you some days ago was delivered in record-breaking time.

Yours truly,
J. A. Leggitt,
Cashier.

GENERAL CATALOG INDEX

WHERE TO QUICKLY FIND WHAT YOU WANT

NOTE: For the convenience and quick, ready reference of the user of this catalog, we have used three different colors of paper so you can more quickly locate the particular product you want to order or investigate.

HERE IS THE COLOR PAPER REFERENCE:
